This *Crime in Illinois 2006* publication is the 35th annual report on crime statistics in Illinois. The information contained in the publication is based upon crime statistics submitted by police departments, sheriffs' offices, and specialized law enforcement agencies to the Illinois Uniform Crime Reporting (I-UCR) Program in 2006.

This 2006 Crime in Illinois Report presents a statewide overview of serious crimes that have occurred in our state. Information reported in this publication measures the nature and volume of crime within various jurisdictions in Illinois. *Crime in Illinois* remains a valuable tool for enhancing the public's awareness of the impact of crime on their communities.

LAW ENFORCEMENT OFFICERS KILLED

During 2006, eight Illinois law enforcement officers lost their lives in the performance of duty while upholding the laws of the State of Illinois. A brief narrative on the circumstances surrounding their death is presented below.

January 4, 2006 - COOK COUNTY SHERIFF'S POLICE DEPARTMENT

Patrol Officer James Knapp, 50, was killed in a automobile accident while enroute to the sheriff's station when his squad car rear-ended a semi-tractor during foggy weather and slippery road conditions. Officer Knapp had served with the Cook County Sheriff's Police Department for 16 years and is survived by his wife and two sons.

February 12, 2006 - CHICAGO POLICE DEPARTMENT

Police Officer Eric Solorio, 26, succumbed to injuries sustained in an automobile accident three weeks earlier. On January 17, 2006, Officer Solorio was involved in a pursuit when the squad car he was riding in was cut off by another driver and struck a tree and building. Officer Solorio had served with the Chicago Police Department for 3.5 years. He is survived by his mother, brother, and two sisters.

February 12, 2006 - HARDIN COUNTY SHERIFF'S OFFICE

Deputy Sheriff Elizabeth Edwards, 26, was killed in an automobile accident while enroute to a call. Deputy Edwards was responding to a report of an automobile accident when icy conditions caused her patrol car to leave the roadway and strike a tree. Deputy Edwards had served the Hardin County Sheriff's Office for one year. She is survived by her parents and sisters.

APRIL 24, 2006 - CAHOKIA POLICE DEPARTMENT

Police Officer Jeremy Chambers, 26, was killed when his patrol car was struck by a vehicle operated by an intoxicated driver. Officer Chambers was transported to the hospital where he succumbed to his injuries. Officer Chambers had served with the Cahokia Police Department for 2.5 years and also served as a volunteer firefighter. He is survived by his parents, sister, and brother.

MAY 12, 2006 - ILLINOIS STATE POLICE

Sergeant Rodney Todd Miller, 40, was killed in an automobile accident when his car was struck by another. Sergeant Miller was a 16-year veteran of the Illinois State Police. He is survived by his wife and two sons.

INTRODUCTION

The Illinois Uniform Crime Reporting Program

The Illinois Uniform Crime Reporting (I-UCR) Program was developed in 1971 and implemented on January 1, 1972. The Illinois State Police was given the responsibility to act as the central repository for crime statistics. Reporting crime statistics is mandated by Chapter 20 of the Illinois Compiled Statutes, 2630/8.

2630/8. Crime Statistics. The Department shall be a central repository and custodian of crime statistics for the State and it shall have all power incident thereto to carry out the purposes of this Act, including the power to demand and receive cooperation in the submission of crime statistics from all units of government.

Reporting agencies submit data on a monthly basis to the I-UCR Program. Participating jurisdictions include villages, municipalities, counties, colleges, universities, park districts, railroads, forest preserves, hospitals, and other miscellaneous agencies throughout Illinois.

Crime index offenses, crime index offense arrests, and drug crime arrests are required to be reported by local law enforcement agencies. In April 1996, the Illinois State Police began the collection of additional crime statistics mandated by state statutes. These include Domestic Violence, Attacks Against School Personnel, and Hate Crimes. Crimes Against Children are also reported voluntarily to the I-UCR Program.

Please note: The 2006 figures reported in this publication include data as of March 16, 2007. The 2005 figures may not reflect the figures published in *Crime in Illinois 2005* due to submission of late and/or adjusted data.

Crime Index data is also used by other agencies. For more information, browse the following websites:

Considerations for Interpretation

When comparing the crime statistics of one agency to those of another, many factors should be taken into consideration before conclusions are made. Some of the conditions affecting the type and volume of crime are:

- Population density and degree of urbanization
- Variations in composition of the population, particularly youth concentration
- Stability of population with respect to residents' mobility, commuting patterns, and transient factors
- Modes of transportation and highway system
- Economic conditions, including median income, poverty level, and job availability
- Cultural factors and educational, recreational, and religious characteristics
- Family conditions with respect to divorce and family cohesiveness
- Climate
- Effective strength of law enforcement agencies
- Administrative and investigative emphases of law enforcement
- Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probational)
- Citizens' attitudes toward crime
- Crime reporting practices of citizens¹

Guard against direct agency-to-agency comparisons when analyzing I-UCR statistics. Such comparisons could be misleading unless demographic differences between jurisdictions are taken into account. Every community has unique social, ethnic, and economic factors which may affect its crime statistics. These dissimilarities may bias the results of any comparative analysis between agencies. A jurisdiction's crime situation is complex and cannot always be treated superficially, as it might be in direct agency-to-agency comparisons. Keep in mind that some agencies' jurisdictions, such as railroads, are comprised of non-geographical areas.

In addition, uniform crime reporting statistics reflect "offenses known to police." In other words, these crime counts and rates only reflect information on crimes reported to police, not necessarily all crimes that occurred. Propensity to report a crime varies by type of crime and the individual characteristics of the victim. For more information, see the *National Crime Victimization Survey*, administered by the U.S. Department of Justice, Bureau of Justice Statistics.

In general, the decision to use any indicator for analysis purposes must be made with care. The I-UCR indicators discussed within this publication have utility for law enforcement administrators; however, they must be used with caution. No single indicator is sufficient for thorough crime analysis. Instead, decisions that law enforcement administrators are called upon to make require a multifaceted analytical approach.

I-UCR Reporting Agencies

In 2006, there were 1,123 law enforcement agencies in Illinois; eighty-seven percent of these agencies (972) reported crime statistics directly to the Illinois State Police. The remaining agencies reported their crime statistics through an intermediary agency (sheriff's office, police department, etc.).

The Crime Index / Crime Rate

Most of the offense and arrest statistics in this publication focus primarily on what is known as the Crime Index. In aggregate, the eight crime categories that make up this index provide an indication of the extent serious crime occurs in the jurisdiction, region, or state. Four of the crime index categories collected by the I-UCR Program include violent crimes - murder, criminal sexual assault, robbery, and aggravated assault/battery (including attempted murder and ritual mutilation); and four include property crimes - burglary, larceny/theft (including burglary from a motor vehicle), motor vehicle theft, and arson.

The I-UCR Program's **crime index** translates into the FBI National Program's eight Crime Index offenses as:

Violent Crimes

Murder and Nonnegligent Manslaughter - The willful (nonnegligent) killing of one human being by another.

Forcible Rape - The carnal knowledge of a female, forcibly and against her will - includes attempted rape. (Illinois reports criminal sexual assault offenses against males *and* females rather than rape offenses under this category.)

Robbery - The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence - includes attempted robbery.

Aggravated Assault - The intentional causing of serious bodily harm or the intentional attempt or threat of serious bodily injury or death - includes aggravated battery, attempted murder, and ritual mutilation.

Property Crimes

Burglary - The unlawful entry of a structure to commit a felony or theft - includes attempted burglary.

Theft - The unlawful taking or stealing of property or articles without the use of force, violence, or fraud - includes burglary from a motor vehicle and attempts.

Motor Vehicle Theft - The unlawful taking or stealing of a motor vehicle - includes attempted motor vehicle theft.

Arson - The willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building or any building, motor vehicle, aircraft, or personal property of another.

The **crime rate** indicates the prevalence of crime occurring across a given population. It is generally defined as the total number of index crimes per 100,000 inhabitants and is calculated as follows:

$$\frac{\text{Crime Index Count} \times 100,000}{\text{Jurisdictional Population}} = \text{Crime Rate}$$

The jurisdictional population can be that of a city, town, village, state, or nation.

The **percent change** indicates the increase or decrease of the volume of data represented.

$$\frac{\text{Current Figure} - \text{Previous Figure}}{\text{Previous Figure}} \times 100 = \text{Percent Change}$$

SECTION I - CRIME TRENDS

Crime Trends - A Historical Perspective

This historical information is intended to provide a comprehensive perspective of crime trends. The graph below illustrates the general trend in crimes reported in Illinois from 1974 to 2006. The Crime Index is composed of selected offenses used to gauge fluctuations in the overall volume and rate of crime reported to law enforcement. The offenses included are the violent crimes of murder, criminal sexual assault, robbery, and aggravated assault/battery (including attempted murder and ritual mutilation); and the property crimes of burglary, theft (including burglary from a motor vehicle), motor vehicle theft, and arson.

Crime trends may be analyzed using two separate methods: crime volume and crime rates. Crime volume is merely the aggregate total of the Crime Index. By comparing the crime volume from year to year, trends in the number of crimes reported to police can be studied. Crime rates are compiled to compensate for the changes in the size of population. Crime rates are generally expressed as the total number of index crimes per 100,000 inhabitants.

For ease of interpretation, the crime rate is shown for each year from 1974 through 2006. The term "Rate" refers to the number of crimes per 100,000 inhabitants. The crime rate is calculated by dividing the number of crimes reported to police by the jurisdictional population, and multiplying that number by 100,000.

Illinois Crime Index Offense Rate 1974-2006

Considerations for interpretation:

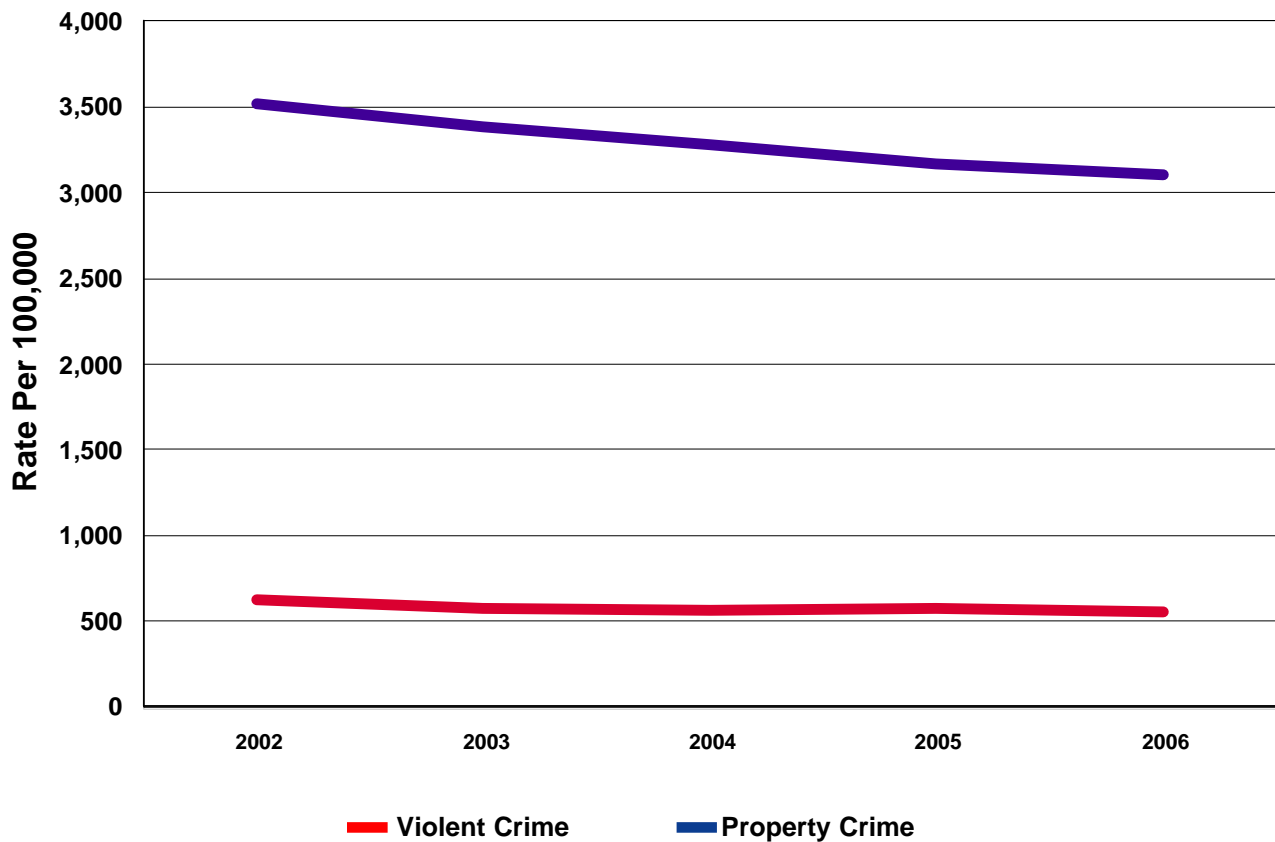

On January 1, 1992, the Revised Illinois Uniform Crime Reporting Program, operating under the Federal Bureau of Investigation's National Incident Based Reporting System (NIBRS) criteria, became operational. This new system was used to collect data from 1992 through 1993. In 1994 the Illinois State Police implemented a new reporting procedure. Data was captured and provided to the Illinois State Police on a Monthly Crime Index Form ISP 2-423 (2/07). Crime index offenses, crime index offense arrests, and drug crime arrests were required to be reported by the local law enforcement agency. This same procedure is still in use to date. However, the change in reporting may have contributed to the decrease in Index offense rates from 1991-1993.

Effective July 1, 1984, sex crimes committed in Illinois were governed by a new statute entitled "Illinois Criminal Sexual Assault Act" (Chapter 720 ILCS 5/12-13,14). This statute repealed eight existing laws in Illinois including rape. On July 1, 1984, law enforcement agencies began reporting the new sex offenses to the I-UCR Program. The criminal sexual assault category reflects offenses reported as rape from 1972 through June 30, 1984. Effective July 1, 1984, offenses were reported as aggravated criminal sexual assault and criminal sexual assault.

Crime Trends - A Historical Perspective

Violent crime offenses consist of murder, criminal sexual assault, robbery, and aggravated assault/battery (including attempted murder and ritual mutilation). Violent crimes accounted for 15.2 percent of the crime index total in 2006. Property crime offenses consist of burglary, theft (including burglary from a motor vehicle), motor vehicle theft, and arson. Property crimes accounted for 84.8 percent of the crime index total in 2006.

Crime Trends - A Historical Perspective

Violent crime index offense rates for murder and robbery decreased while criminal sexual assault and aggravated assault/battery increased. Murder and criminal sexual assault remain the smallest contributors to the overall violent crime index offense total.

Counties are considered urban if their population consists of at least 50,000 residents or if they contribute at least 50,000 residents to a total Metropolitan Statistical Area (MSA) of 100,000. An area qualifies for recognition as an MSA in one of two ways: (1) if it includes a city of at least 50,000 population, or (2) if it includes an urbanized area of at least 50,000 population with a total metropolitan population of 100,000. The MSA comprises the central county or counties containing the core, plus adjacent outlying counties having a high degree of social and economical integration with the central county as measured through commuting ties. Those that are not part of an MSA are classified as rural counties.

SECTION II - CRIME INDEX OFFENSE/ CRIME RATE DATA

Crime Index Offense /Crime Index Offense Arrest Data

This section presents crime index offenses, crime index offense arrests, drug crime arrests, and supplemental data offenses reported to police. The I-UCR crime index offenses and arrests include the categories of murder, criminal sexual assault, robbery, aggravated assault/battery (including attempted murder and ritual mutilation), burglary, theft (including burglary from a motor vehicle), motor vehicle theft, and arson. The drug crime arrest section includes violations of the Cannabis Control Act, Controlled Substances Act, Hypodermic Syringes and Needles Act, and Drug Paraphernalia Act. The supplemental data section includes the offenses of crimes against school personnel, crimes against children, domestic crimes, and hate crimes categories. Due to the volume of data reported, only state and county totals are published for the crime index offense arrest, drug crime arrest, and supplemental data categories.

Caution should be exercised when reviewing and using this information. Many social factors related to crime and a community's population must be considered when making statistical comparisons. For example, a community may have a small residential population but a large transient population because of a substantial number of employers, motels, entertainment attractions, etc., within its jurisdiction. A large transient population increases the potential for criminal behavior within a small jurisdiction. The population-based crime rate calculation does not compensate for a transient population, and the statistics can make it appear that crime is more prevalent than reality would indicate.

The law enforcement employee information totals consist of sworn, civilian, and auxiliary personnel who were employed by sheriffs' offices, police departments (including those that report data directly and indirectly to the I-UCR Program), colleges, and universities as of October 31, 2006 (see page 219 for law enforcement employee definitions).

Each county total reflects crime data reported by police departments, sheriffs' offices, colleges, and universities that are located within each county. Since the Secretary of State has districts that are statewide, the Secretary of State totals are not reflected in the county total but are reflected in the state total. Data reported from non-traditional jurisdictions, such as hospitals, airports, etc., may have been previously reported by another reporting agency and are excluded from the state and county totals.

The Crime Index Offense/Crime Index Offense Arrest/Crime Rate Comparison State Total is an aggregate total of the sheriffs' offices, police departments, colleges, universities, and the Secretary of State.

The footnotes in Section II are defined as follows:

- **1 - "One or More Months Missing"** indicates that an agency reports directly to the I-UCR Program, but that one or more monthly UCR reports were delinquent for that reporting year.
- **2 - "Agency in Non-Compliance"** indicates that the agency has reported UCR reports in the past, but did not provide UCR reports at all during the reporting year.
- **3 - "Reported Through Other Agency"** indicates that the agency reported their UCR data through another law enforcement agency during the reporting year.
- **4 - "Partial Year Reporting"** indicates that a) either a law enforcement agency started direct reporting to the I-UCR Program during the reporting year; or b) a law enforcement agency ceased to exist or lost its officers during the year, and UCR reporting was terminated.

Crime Index Offense /Crime Index Offense Arrest Data

This section used the most recent complete census population statistics available from the United States (U.S.) Bureau of the Census. The 2005 crime rates for this section were calculated using the July 1, 2004, estimated population statistics which were obtained from the U.S. Bureau of the Census. The 2006 crime rates were calculated using the July 1, 2005, estimated population statistics. Variations from these estimated statistics are a result of a special census or corrections received from the U.S. Bureau of the Census or from the reporting agency.

Since a sheriff's office population is calculated by subtracting the I-UCR reporting agencies' population from the county population total, multi-county jurisdictions may impact a sheriff's office crime rate. Therefore, unless otherwise noted, the I-UCR Program has proportioned each of the multi-county jurisdiction's crime rate, crime index total, and each of the eight crime index offenses based on the percentage of the population residing in each county. In some cases, the percentages may not sum to 100 due to rounding. There were 87 cities with I-UCR reporting jurisdictions located in more than one county (see pages 243-260 for a list of multi-county jurisdictions).

Example:

A city with a population of 100,000 has 75,000 or 75.0 percent of its population in County 1 and 25,000 or 25.0 percent of its population in County 2. The total crime index offenses reported by the agency in 2005 is 2,500.

The crime index has been computed as follows for County 1 and County 2:

Jurisdiction	County	Population	Calculation	Total Crime Index
City	County 1	75,000	.750 x 2,500 =	1,875
City	County 2	25,000	.250 x 2,500 =	625
	Total	100,000	Total	2,500

SECTION III - CORE BASED STATISTICAL AREAS

Core Based Statistical Areas

The United States Office of Management and Budget developed new standards to define Core Based Statistical Areas (CBSAs) beginning in 2003. These new standards replace and supersede the 1990 standards for defining Metropolitan Statistical Areas.

CBSAs are defined as a statistical geographic entity consisting of the county or counties associated with at least one core (urbanized area or urban cluster) of at least 10,000 population, plus adjacent counties having a high degree of social and economic integration with the core as measured through commuting ties with the counties containing the core. The new standards designate and define two categories of CBSAs: Metropolitan Statistical Areas and Micropolitan Statistical Areas. These are the terms used for the basic set of county-based areas as defined under this classification.

Metropolitan Statistical Areas have at least one urbanized area of 50,000 or more population, plus adjacent territory that has a high degree of social and economic integration with the core as measured by commuting ties. Micropolitan Statistical Areas - a new set of statistical areas - have at least one urban cluster of 10,000 but less than 50,000 population, plus adjacent territory that has a high degree of social and economic integration with the core as measured by commuting ties. If the specified criteria are met, a Metropolitan Statistical Area containing a single core with a population of 2.5 million or more may be subdivided to form smaller groupings of counties referred to as Metropolitan Divisions. Counties that do not fall within CBSAs represent Outside Core Based Statistical Areas.

Six of Illinois' Metropolitan and Micropolitan Statistical Areas are part of areas in Indiana, Iowa, Kentucky, Missouri, and Wisconsin. Areas outside of Illinois are not represented in the statistics presented here. In some cases the percentages may not equal 100 due to rounding.

Metropolitan and Micropolitan Statistical Areas Summary

The Metropolitan and Micropolitan Statistical Areas summary includes county-based areas which meet the criteria for a Metropolitan or Micropolitan Statistical Area. The inhabitants of these areas account for 95.2 percent of the state population. The total crime index offenses of these areas account for 97.5 percent of the Illinois crime index offenses.

Metropolitan Statistical Areas Summary

The Metropolitan Statistical Areas comprise the central county or counties containing the core (urbanized area that has a population of at least 50,000), plus adjacent outlying counties having a high degree of social and economic integration with the central county as measured through commuting ties. There are 11 Metropolitan Statistical Areas that include 36 Illinois counties.

The inhabitants of the Metropolitan Statistical Areas represent 86.8 percent of the state's population. The Metropolitan Statistical Areas account for 90.6 percent of the Illinois crime index offenses.

Metropolitan Division Summary

A Metropolitan Division is a county or group of counties within a Metropolitan Statistical Area that contains a core with a population of at least 2.5 million. There are two Metropolitan Divisions that include counties in Illinois. The Chicago - Naperville - Joliet, IL - IN - WI Metropolitan Statistical Area is comprised of the Chicago - Naperville - Joliet, IL Metropolitan Division; the Gary, IN Metropolitan Division; and the Lake County - Kenosha County, IL - WI Metropolitan Division.

The table below represents the population and crime index offenses for the counties (Cook, DeKalb, DuPage, Grundy, Kane, Kendall, McHenry, and Will) that are included in the Chicago - Naperville - Joliet, IL Metropolitan Division. The inhabitants of the Chicago - Naperville - Joliet, IL Metropolitan Division represent 59.4 percent of the state's population and account for 63.7 percent of the Illinois crime index offenses. The Lake County - Kenosha County, IL - WI and Gary, IN Metropolitan Divisions are not included in this table since they include areas in Indiana and Wisconsin.

SECTION IV - SUPPLEMENTAL DATA

DOMESTIC CRIMES, CRIMES AGAINST CHILDREN, CRIMES AGAINST SCHOOL PERSONNEL, HATE CRIMES DATA

In April 1996, the Illinois State Police began collecting additional crime information. This data includes statistics pertaining to offenses mandated by state statutes and offenses concerning children. The data in this section reflects crimes occurring from January 1 through December 31, 2006. Due to limitations of agencies' reporting systems, all agencies are not included in the totals presented in the following tables. In some cases, the percentages may not sum to 100 due to rounding.

Domestic Crimes

This category reflects domestic-related crimes. Reporting domestic violence is mandated by Chapter 20 of the Illinois Compiled Statutes, 2630/5.1. Domestic-related crimes are defined as crimes committed by family or household members, including spouses, former spouses, parents, children, stepchildren and other persons related by blood or marriage, persons who share or formerly shared a common dwelling, and persons who have or allegedly have a child in common. In the case of a high-risk adult with disabilities, family or household member includes any person who has the responsibility for a high-risk adult as a result of a family relationship or who has assumed responsibility for all or a portion of the care of a high-risk adult with disabilities voluntarily, or by express or implied contract, or court order.

Crimes Against Children

Although reporting in this category is not mandated by state statutes, information is collected to research and evaluate the problems of offenses against children. Contributing agencies are not required to report this data to the I-UCR Program. All crimes reported to participating agencies that involve victims aged 16 years and younger are included in this category.

Crimes Against School Personnel

The reporting of attacks on school personnel is mandated by Chapter 105 of the Illinois Compiled Statutes, 5/10-21.7. The I-UCR Program collects information relating to all crimes committed against teachers, administrative personnel, or educational support personnel. This includes teacher's aides, bus drivers, or janitors, etc., who are employed by the school.

Hate Crime

The reporting of hate crime information is mandated by Chapter 20 of the Illinois Compiled Statutes, 2605-390(a). A hate crime is committed when, by reason of the actual or perceived race, color, creed, religion, ancestry, gender, sexual orientation, physical or mental disability, or national origin of another individual or group of individuals, a person commits assault, battery, aggravated assault, misdemeanor theft, criminal trespass to residence, misdemeanor criminal damage to property, criminal trespass to vehicle, criminal trespass to real property, mob action, or disorderly conduct.

**SECTION V -
LAW ENFORCEMENT
EMPLOYMENT INFORMATION**

Law Enforcement Employment Information

The law enforcement employment information presented in this section is comprised of the number of part- and full-time sworn officers, full-time civilian employees, and auxiliary officers as of October 31, 2006. The part- and full-time sworn officer category includes the number of sworn personnel with full arrest powers (includes chiefs, sheriffs, commissioners, superintendents, etc.) who are paid by their agency or federal grant funds. The full-time civilian category includes civilian employees (includes clerks, stenographers, telecommunicators, mechanics, civilian jail personnel, etc.) who are paid by their agency or federal grant funds. The auxiliary officer category includes those officers who are not on active duty, such as an auxiliary or reserve officer that is subject to report in an emergency situation, and who are not paid by their agency or federal grant funds. Active auxiliary officers are counted under the part-time sworn officer category.

Sworn and civilian full-time law enforcement employees by agency type:

# of Sworn & Civilian Full-Time Employees	Police Departments	Sheriffs' Offices	Misc. Agencies	Total	% of Total
0-10	484	13	44	541	52.2%
11-50	234	55	44	333	32.1%
51-200	106	27	10	143	13.8%
200+	10	7	3	20	1.9%
Total	834	102	101	1,037	100.0%

The employment rate for law enforcement personnel is calculated as follows:

$$\frac{\text{Number of Employees}}{\text{Jurisdictional Population}} \times 1,000 = \text{Employment Rate}$$

EXAMPLE:

A department with 60 employees and a population of 51,000 has an employment rate of 1.2 per 1,000 inhabitants:

$$\frac{60}{51,000} \times 1,000 = 1.2 \text{ Rate per 1,000 Inhabitants}$$

Law enforcement employment rates should not be directly compared to index crimes, non-index offenses, or the service-related activities performed by law enforcement officers. Service-related activities account for over 80 percent of the officers' workload, and usually remain unpublished. Each community should consider all the factors related to the causes of crime and determine the role of the law enforcement department relative to crime and to required services.
