Effective law enforcement efforts utilize the compilation of crime statistics in order to identify the extent of criminal activity. Information reported in this publication measures the nature and volume of crime within various jurisdictions in Illinois. In its 37th year of publication, Crime in Illinois remains a valuable tool for enhancing law enforcement and the public's awareness of the impact of crime on their communities.

Law enforcement agencies rely on Illinois Uniform Crime Reporting (I-UCR) statistics in determining staffing decisions, allocating funding and resources, gauging the effectiveness of specific programs, and supporting legislative and judicial mandates. I-UCR statistics have also developed into an effective resource for researchers, criminologists, media services, academics, the public, civic organizations, and others seeking a better understanding of the state of crime in Illinois.

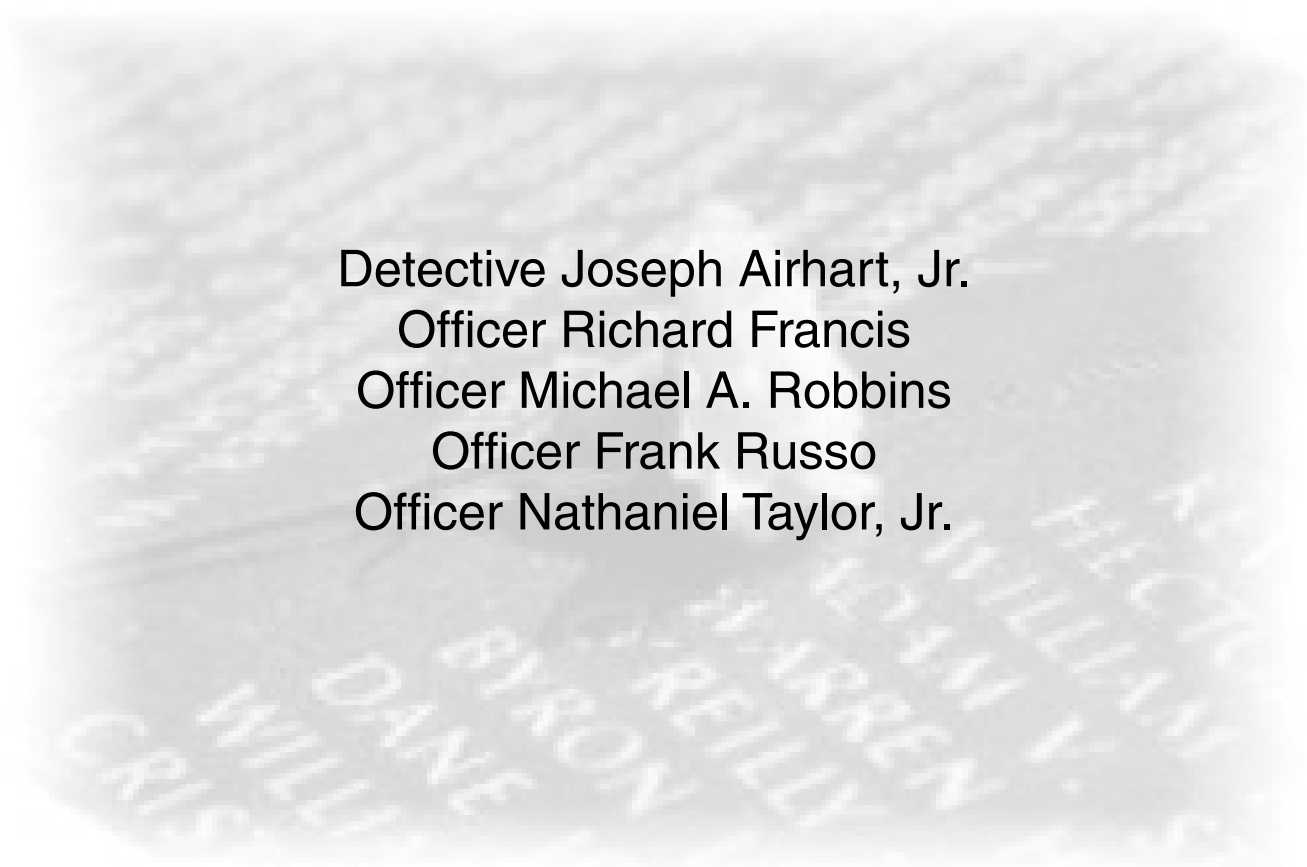

These crime statistics could not have been compiled without the dedication and cooperation of police agencies, sheriffs' offices, and other specialized law enforcement agencies throughout Illinois. The contributions of participating agencies that provided statistical data made possible this comprehensive picture of crime in Illinois.

With thanks to all those whose commitment contributed significantly to this publication, I present Crime in Illinois 2008.

LAW ENFORCEMENT OFFICERS KILLED

During 2008, five Illinois law enforcement officers lost their lives in the performance of their duties while upholding the laws of the state of Illinois. A brief narrative of the circumstances surrounding their deaths is presented below.

July 2, 2008 - CHICAGO POLICE DEPARTMENT

Police Officer Richard Francis was shot and killed during a struggle with a suspect. Officer Francis was on routine patrol and responded to a report of a disturbance. Upon arrival, he approached the female, who grabbed his gun shooting him once. The suspect was critically injured when back-up officers opened fire on the female after she threatened them. Officer Francis had served with the Chicago Police Department for 27 years.

September 13, 2008 - CHICAGO POLICE DEPARTMENT

Police Officer Michael A. Robbins succumbed to wounds sustained 14 years earlier while responding to a call of shots fired in a neighborhood. Upon arrival, a suspect fired multiple times at the officers from an open window, striking Officer Robbins eleven times. Officer Robbins had served with the Chicago Police Department for eight years at the time of the incident.

September 28, 2008 - CHICAGO POLICE DEPARTMENT

Police Officer Nathaniel Taylor, Jr. was shot and killed while executing a search warrant. The suspect arrived while officers were still at the scene. When officers approached the suspect, he opened fire, striking Officer Taylor three times. Officer Taylor was transported to the hospital where he died a short time later. Officer Taylor was a United States Marine Corps veteran and had served with the Chicago Police Department for 14 years.

November 1, 2008 - SCHAUMBURG POLICE DEPARTMENT

Police Officer Frank Russo suffered a fatal heart attack while struggling with a suspect following a foot pursuit. Officer Russo and another officer were attempting to arrest a man causing a disturbance at a local club. The suspect fled the scene and a struggle ensued following a brief pursuit. During the struggle, Officer Russo collapsed. He was transported to the hospital where he died a short time later. Officer Russo had served with the Schaumburg Police Department for 19 years.

November 4, 2008 - CHICAGO POLICE DEPARTMENT

Detective Joseph Airhart, Jr. succumbed to wounds sustained seven years earlier while leading an Federal Bureau of Investigations Task Force raid at the home of a bank robbery suspect. Upon entering the home, the suspect opened fire on the officers. Detective Airhart was wounded and held hostage for two hours before the suspect was taken into custody. Detective Airhart had served with the Chicago Police Department for 19 years at the time of the incident.

INTRODUCTION

The Illinois Uniform Crime Reporting Program

The Illinois Uniform Crime Reporting (I-UCR) Program was developed in 1971 and implemented on January 1, 1972. The Illinois State Police was given the responsibility to act as the central repository for crime statistics. Reporting crime statistics is mandated by Chapter 20 of the Illinois Compiled Statutes, 2630/8.

2630/8. Crime Statistics. The Department shall be a central repository and custodian of crime statistics for the State and it shall have all power incident thereto to carry out the purposes of this Act, including the power to demand and receive cooperation in the submission of crime statistics from all units of government.

Reporting agencies submit data on a monthly basis to the I-UCR Program. Participating jurisdictions include villages, municipalities, counties, colleges, universities, park districts, railroads, forest preserves, hospitals, and other miscellaneous agencies throughout Illinois.

Crime index offenses, crime index offense arrests, and drug crime arrests are required to be reported by local law enforcement agencies. In April 1996, the Illinois State Police began the collection of additional crime statistics mandated by state statutes. These include Domestic Violence, Attacks Against School Personnel, and Hate Crimes. Crimes Against Children are also reported voluntarily to the I-UCR Program.

Please note: The 2008 figures reported in this publication include data as of April 20, 2009. The 2007 figures may not reflect the figures published in *Crime in Illinois 2007* due to submission of late and/or adjusted data.

Crime Index data is also used by other agencies. For more information, browse the following websites:

Crime Statistics Interpretation Considerations

When comparing the crime statistics of one agency to those of another, many factors should be taken into consideration before drawing conclusions. Some conditions affecting the type and volume of crime are:

- Population density and degree of urbanization
- Variations in composition of the population, particularly youth concentration
- Stability of population with respect to residents' mobility, commuting patterns, and transient factors
- Modes of transportation and highway system
- Economic conditions, including median income, poverty level, and job availability
- Cultural factors and educational, recreational, and religious characteristics
- Family conditions with respect to divorce and family cohesiveness
- Climate
- Effective strength of law enforcement agencies
- Administrative and investigative emphases of law enforcement
- Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probational)
- Citizens' attitudes toward crime
- Crime reporting practices of citizens¹

Guard against direct agency-to-agency comparisons when analyzing I-UCR statistics. Such comparisons could be misleading unless demographic differences between jurisdictions are taken into account. Every community has unique social, ethnic, and economic factors which may affect its crime statistics. These dissimilarities may bias the results of any comparative analysis between agencies. The state of crime within a given jurisdiction is complex and cannot always be treated superficially, as it might be in direct agency-to-agency comparisons. The definition of jurisdiction itself may vary between agencies, as evidenced by railroad agencies whose jurisdictions are comprised of non-geographical areas.

In addition, uniform crime reporting statistics reflect "offenses known to police." In other words, these crime counts and rates only reflect information on crimes reported to police, not necessarily all crimes that occurred. Propensity to report a crime varies by type of crime and the individual characteristics of the victim. For more information, see the *National Crime Victimization Survey*, administered by the U.S. Department of Justice, Bureau of Justice Statistics.

In general, the decision to use any indicator for analysis purposes must be made with care. The I-UCR indicators discussed within this publication have utility for law enforcement administrators; however, they must be used with caution. No single indicator is sufficient for thorough crime analysis. Instead, decisions law enforcement administrators are called upon to make require a multifaceted analytical approach.

I-UCR Reporting Agencies

In 2008, there were 1,036 law enforcement agencies in Illinois; 86 percent of these agencies (891) reported Crime Index statistics directly to the Illinois State Police. The remaining agencies reported their Crime Index statistics through an intermediary agency (sheriff's office, police department, etc.).

The Crime Index / Crime Rate

A majority of the offense and arrest statistics in this publication focus primarily on what is known as the Crime Index. The eight crime categories that make up this index provide an indication of the extent serious crime occurs in the jurisdiction, region, or state. Four of the eight crime index categories collected by the I-UCR Program are violent crimes against persons including murder, criminal sexual assault, robbery, and aggravated assault/battery (including attempted murder and ritual mutilation). The remaining four categories are crimes against property including burglary, larceny/theft (including burglary from a motor vehicle), motor vehicle theft, and arson.

The I-UCR Program's **crime index** translates into the FBI National Program's eight Crime Index offenses as:

Violent Crimes Against Persons

Murder and Nonnegligent Manslaughter - The willful (nonnegligent) killing of one human being by another.

Forcible Rape - The carnal knowledge of a female, forcibly and against her will - includes attempted rape. (Illinois reports criminal sexual assault offenses against males *and* females rather than rape offenses under this category.)

Robbery - The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence - includes attempted robbery.

Aggravated Assault - The intentional causing of serious bodily harm or the intentional attempt or threat of serious bodily injury or death - includes aggravated battery, attempted murder, and ritual mutilation.

Crimes Against Property

Burglary - The unlawful entry of a structure to commit a felony or theft - includes attempted burglary.

Theft - The unlawful taking or stealing of property or articles without the use of force, violence, or fraud - includes attempted thefts, as well as burglary from a motor vehicle and attempts.

Motor Vehicle Theft - The unlawful taking or stealing of a motor vehicle - includes attempted motor vehicle theft.

Arson - The willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building or any building, motor vehicle, aircraft, or personal property of another - includes attempted arson.

It is important to note that the I-UCR Program may collect additional offenses in each of the eight index crime categories as compared to the FBI National Program based on offense elements as defined by the Illinois Compiled Statutes.

The **crime rate** indicates the prevalence of crime occurring across a given population. It is generally defined as the total number of index crimes per 100,000 inhabitants and is calculated as follows:

$$\frac{\text{Crime Index Count} \times 100,000}{\text{Jurisdictional Population}} = \text{Crime Rate}$$

The jurisdictional population can be that of a city, town, village, state, or nation.

The **percent change** indicates the increase or decrease of the volume of data represented.

$$\frac{\text{Current Figure} - \text{Previous Figure}}{\text{Previous Figure}} \times 100 = \text{Percent Change}$$

SECTION I - CRIME TRENDS

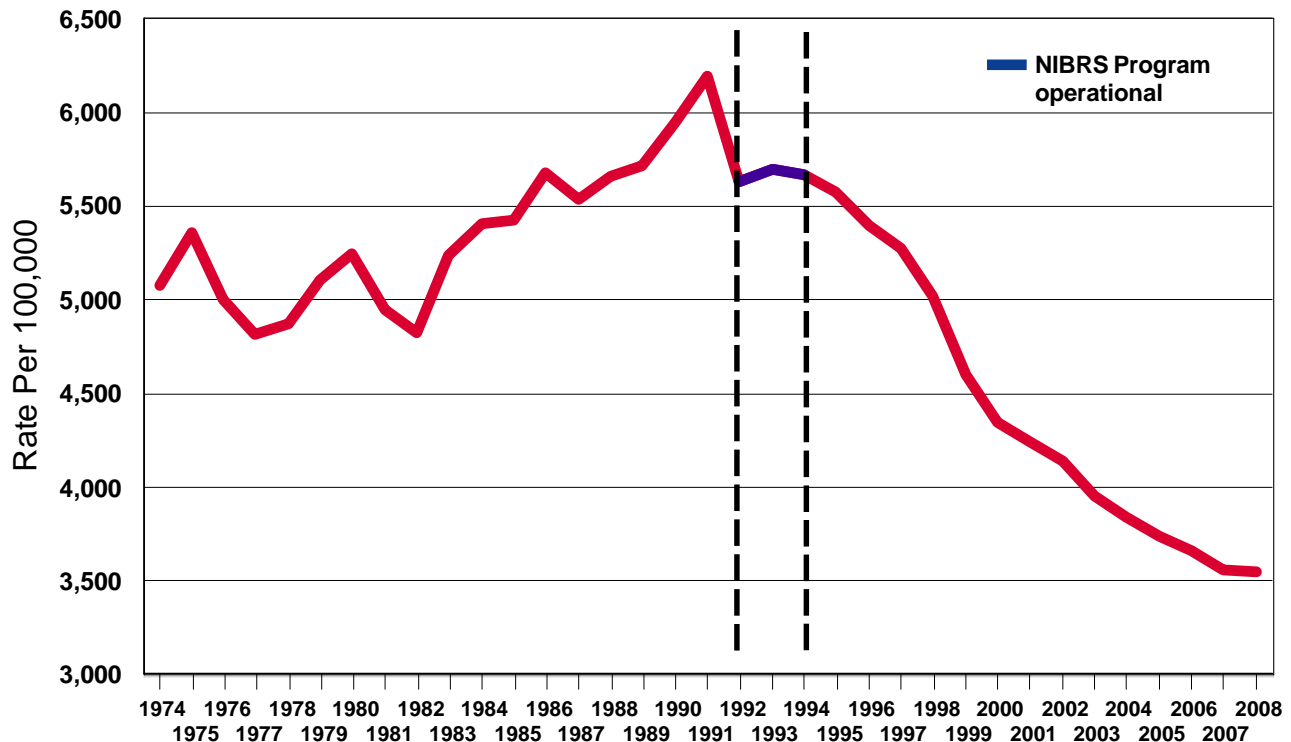

Crime Trends - A Historical Perspective

Historical information is intended to provide a comprehensive perspective of crime trends. The graph below illustrates the general trend of crimes reported in Illinois from 1974 to 2008. The Crime Index is composed of selected offenses used to gauge fluctuations in the overall volume and rate of crime reported to law enforcement. Offenses selected are violent crimes against persons including murder, criminal sexual assault, robbery, and aggravated assault/battery (including attempted murder and ritual mutilation); and crimes against property including burglary, theft (including burglary from a motor vehicle), motor vehicle theft, and arson.

Crime trends may be analyzed using two separate methods: crime volume and crime rates. Crime volume is merely the aggregate total of the Crime Index. By comparing the crime volume from year to year, trends in the number and types of crimes reported to police can be studied. Crime rates are compiled to compensate for the changes in the size of population. Crime rates are generally expressed as the total number of index crimes per 100,000 inhabitants.

The crime rate for the state of Illinois is shown for each year from 1974 through 2008. The term “rate” refers to the number of crimes per 100,000 inhabitants. The crime rate is calculated by dividing the number of crimes reported to police by the jurisdictional population, and multiplying that number by 100,000.

Illinois Crime Index Offense Rate 1974-2008

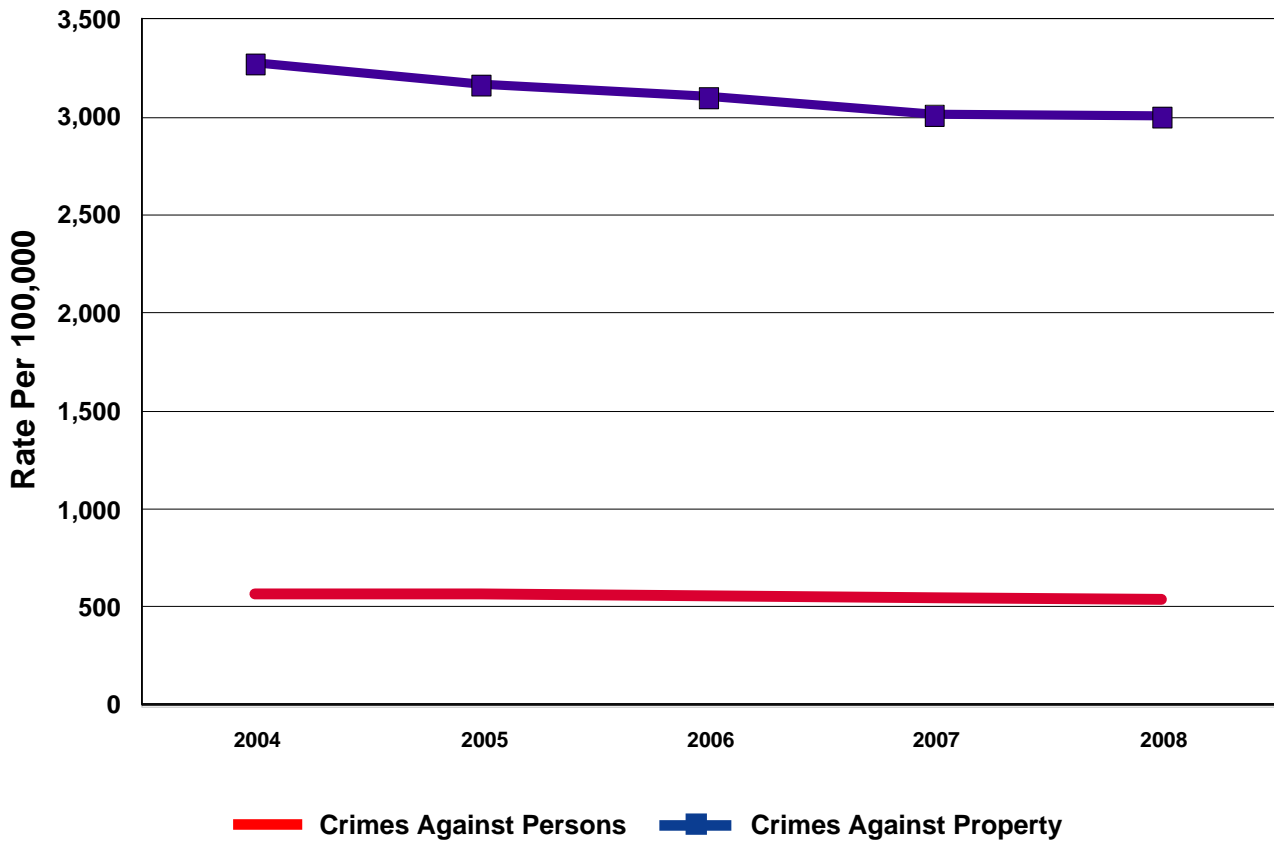

Considerations for interpretation:

On January 1, 1992, the Revised Illinois Uniform Crime Reporting Program, operating under the Federal Bureau of Investigation's National Incident Based Reporting System (NIBRS) criteria, became operational. This new system was used to collect data from 1992 through 1993. In 1994 the Illinois State Police implemented a new reporting procedure. Data was captured and provided to the Illinois State Police on a Monthly Crime Index Form ISP 2-423 (7/08). Crime index offenses, crime index offense arrests, and drug crime arrests were required to be reported by local law enforcement agencies. This procedure is still in use to date; however, the change in reporting procedures in the early 1990s may have contributed to the decrease in Index offense rates from 1991-1993.

Effective July 1, 1984, sex crimes committed in Illinois were governed by a new statute entitled "Illinois Criminal Sexual Assault Act" (Chapter 720 ILCS 5/12-13,14). This statute repealed eight existing laws in Illinois including rape. On July 1, 1984, law enforcement agencies began reporting the new sex offenses to the I-UCR Program. The criminal sexual assault category reflects offenses reported as rape from 1972 through June 30, 1984. After July 1, 1984, offenses were reported as aggravated criminal sexual assault and criminal sexual assault.

Crime Trends - A Historical Perspective

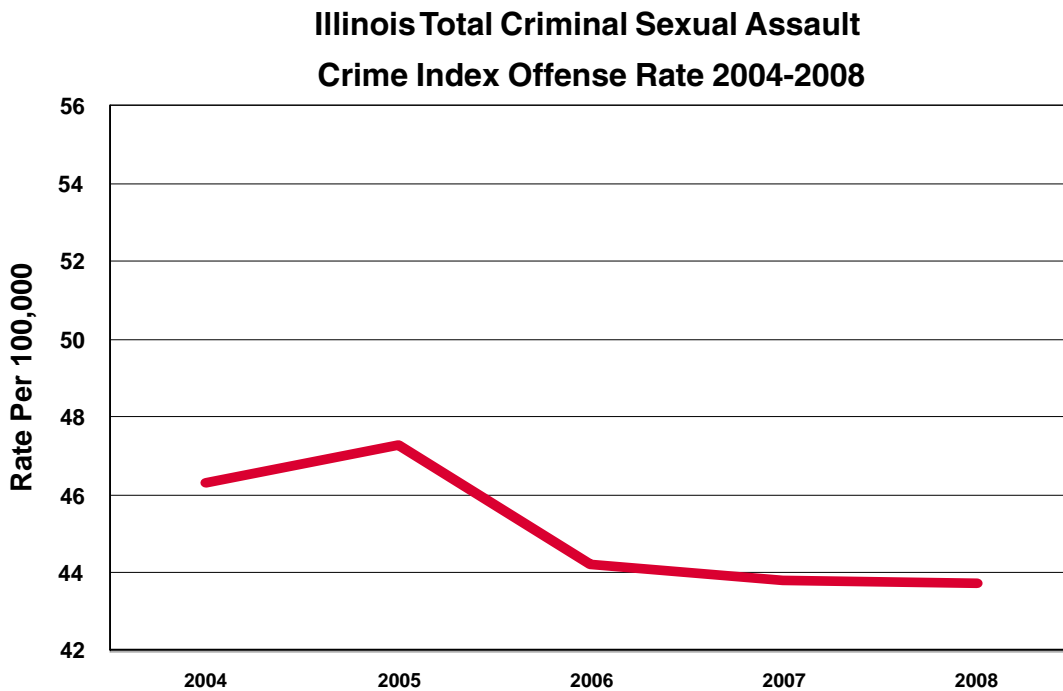

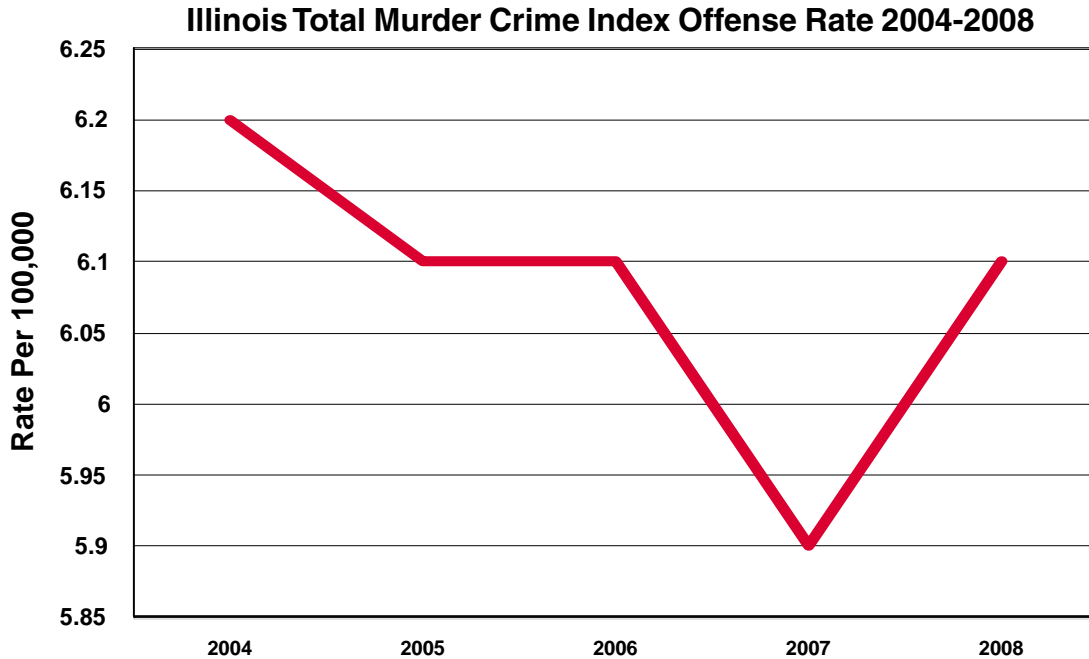

Violent crimes against persons offenses include murder, criminal sexual assault, robbery, and aggravated assault/battery (including attempted murder and ritual mutilation). Violent crimes against persons accounted for 15.2 percent of the crime index total in 2008. Crimes against property offenses include burglary, theft (including burglary from a motor vehicle), motor vehicle theft, and arson. Crimes against property accounted for 84.8 percent of the crime index total in 2008.

Note: See page 18 for the actual crime index offense rates and total number of offenses reported in each category for 2004-2008.

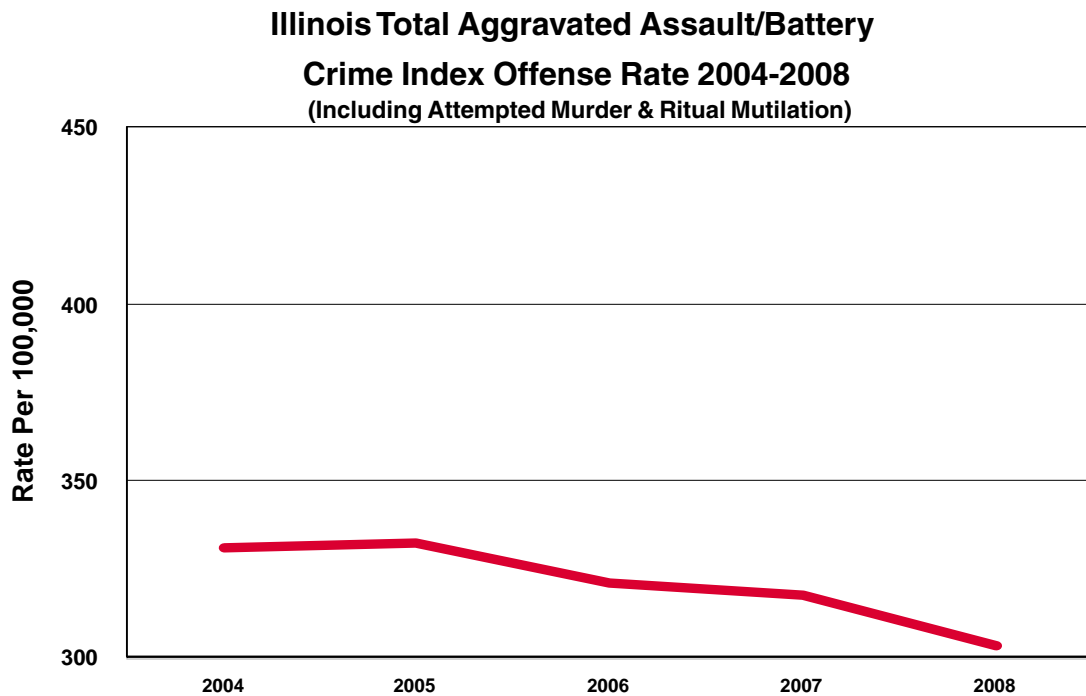

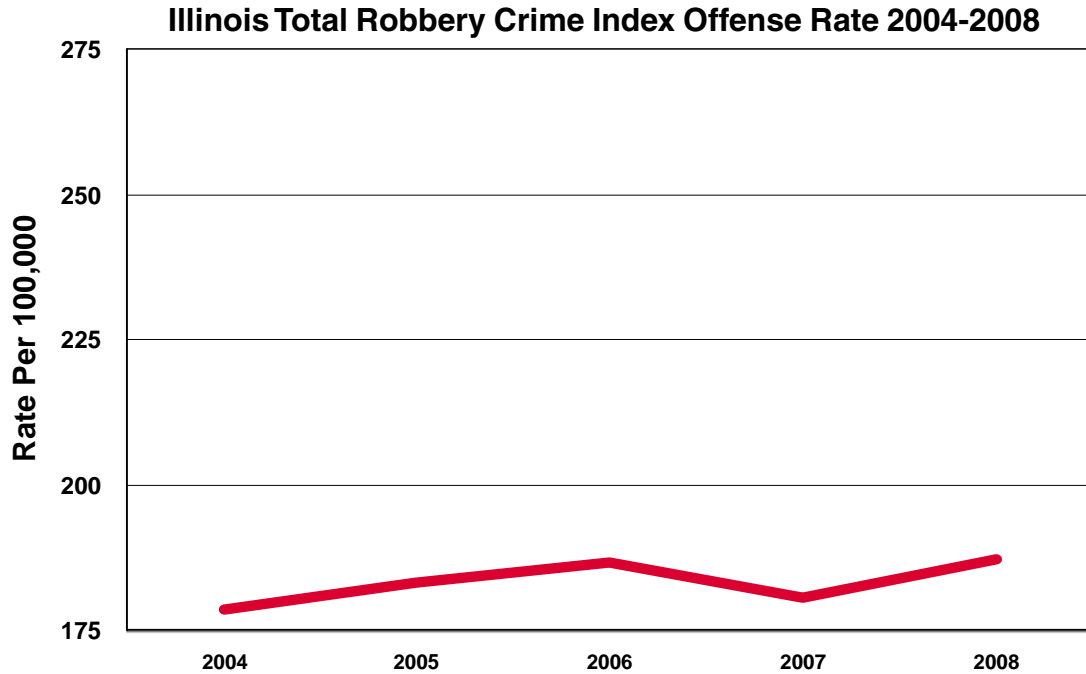

Crime Trends - A Historical Perspective

In the category of violent crimes against persons, crime index offense rates decreased for criminal sexual assault and aggravated assault/battery in 2008, but increased for murder and robbery. Murder and criminal sexual assault remain the smallest percentage of the overall violent crimes against persons crime index offense total.

Note: See page 18 for the actual crime index offense rates and total number of offenses reported in each category for 2004-2008.

Note: See page 18 for the actual crime index offense rates and total number of offenses reported in each category for 2004-2008.

Crime Trends - A Historical Perspective

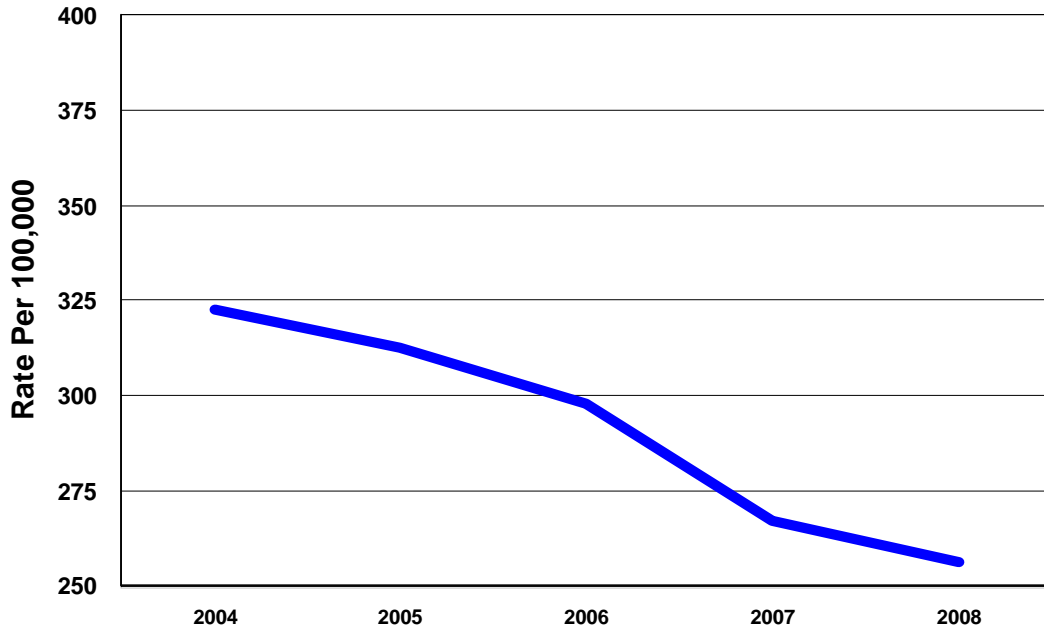

With the exception of burglary, crimes against property crime index offense rates declined in 2008. Arson and motor vehicle theft remain the smallest percentage of the overall crimes against property crime index offense total.

Counties are considered urban if their population consists of at least 50,000 residents or if they contribute at least 50,000 residents to a total Metropolitan Statistical Area (MSA) of 100,000. An area qualifies for recognition as an MSA in one of two ways: (1) if it includes a city of at least 50,000 population, or (2) if it includes an urbanized area of at least 50,000 population with a total metropolitan population of 100,000. The MSA comprises the central county or counties containing the core, plus adjacent outlying counties having a high degree of social and economical integration with the central county as measured through commuting ties. Those that are not part of an MSA are classified as rural counties.

SECTION II - CRIME INDEX OFFENSE/ CRIME RATE DATA

Crime Index Offense/Crime Index Offense Arrest Data

This section presents crime index offenses, crime index offense arrests, drug crime arrests, and supplemental data offenses reported to police. The I-UCR crime index offenses and arrests include the categories of murder, criminal sexual assault, robbery, aggravated assault/battery (including attempted murder and ritual mutilation), burglary, theft (including burglary from a motor vehicle), motor vehicle theft, and arson. The drug crime arrest section includes violations of the Cannabis Control Act, Controlled Substances Act, Hypodermic Syringes and Needles Act, and Drug Paraphernalia Act. The supplemental data section includes the offenses of crimes against school personnel, crimes against children, domestic crimes, and hate crimes. Due to the volume of data reported, only state and county totals are published for the crime index offense arrest, drug crime arrest, and supplemental data categories.

Caution should be exercised when reviewing and using this information. Many social factors related to crime and a community's population must be considered when making statistical comparisons. For example, a community may have a small residential population but a large transient population due to a substantial number of employers, motels, entertainment attractions, etc., within its jurisdiction. A large transient population increases the potential for criminal behavior within a small jurisdiction. The resulting higher population-based crime rate calculation does not compensate for a transient population. The final statistics can lend to the impression that crime is more prevalent due to the exclusion of the transient population in calculation processes.

The law enforcement employee information totals consist of sworn, civilian, and auxiliary personnel who were employed by sheriffs' offices, police departments (including those that report data directly and indirectly to the I-UCR Program), colleges, and universities as of October 31, 2008 (see page 213 for law enforcement employee definitions).

Each county total reflects crime data reported by police departments, sheriffs' offices, colleges, and universities that are located within each county. Data reported from statewide or non-traditional jurisdictions, such as the Secretary of State, Illinois State Police, Department of Natural Resources, hospitals, airports, etc., may have been previously reported by another reporting agency and are excluded from the county totals, and are instead reflected in the state total.

The Crime Index Offense/Crime Index Offense Arrest/Crime Rate Comparison State Total is an aggregate total of the sheriffs' offices, police departments, colleges, universities, and the Secretary of State.

The footnotes in Section II are defined as follows:

- **1 - "Failed to report one or more months"** indicates an agency reports directly to the I-UCR Program, but one or more monthly UCR reports were delinquent for the reporting year.
- **2 - "Partial year reporting/Reported through other agency"** indicates a) a law enforcement agency began direct reporting to the I-UCR Program during the reporting year; or b) a law enforcement agency ceased to exist or all officers left the Agency without being replaced during the year, and UCR reporting was terminated.
- **3 - "Discontinued use of "Hierarchy Rule" in 2008"** indicates an agency began reporting the occurrence of all index crime offenses which may account for some increase in 2008 statistics.

Crime Index Offense/Crime Index Offense Arrest Data

This section used the most recent complete census population statistics available from the United States (U.S.) Bureau of the Census. The 2007 crime rates for this section were calculated using the July 1, 2006, estimated population statistics which were obtained from the U.S. Bureau of the Census. The 2008 crime rates were calculated using the July 1, 2007, estimated population statistics. Variations from these estimates are the result of a special census or documentation submitted by an agency from an official source identifying an increase or decrease in population.

A sheriff's office population is calculated by subtracting the population of agencies who report to the I-UCR Program from the county population total. Multi-county agencies' populations are subtracted from each of the applicable counties' population totals. Multi-county agencies are encouraged to report crime independently for each county; however, some continue to report total crime incident totals with no regard to county of occurrence. In these cases, the I-UCR Program has proportioned each of the multi-county agencies' crime rate, crime index total, and each of the eight crime index offenses based on the percentage of the population residing in each county. In some cases, the percentages may not sum to 100 due to rounding. There were 87 cities with I-UCR reporting jurisdictions located in more than one county (see pages 237-256 for a list of multi-county jurisdictions).

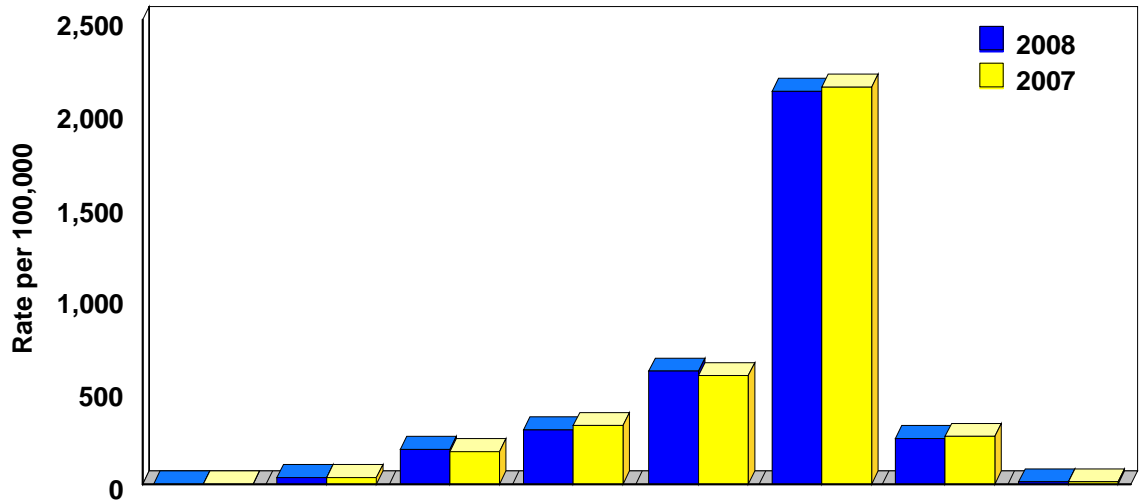

Example:

A city with a population of 100,000 has 75,000 or 75.0 percent of its population in County 1 and 25,000 or 25.0 percent of its population in County 2. The total crime index offenses reported by the agency in 2005 is 2,500.

The crime index has been computed as follows for County 1 and County 2:

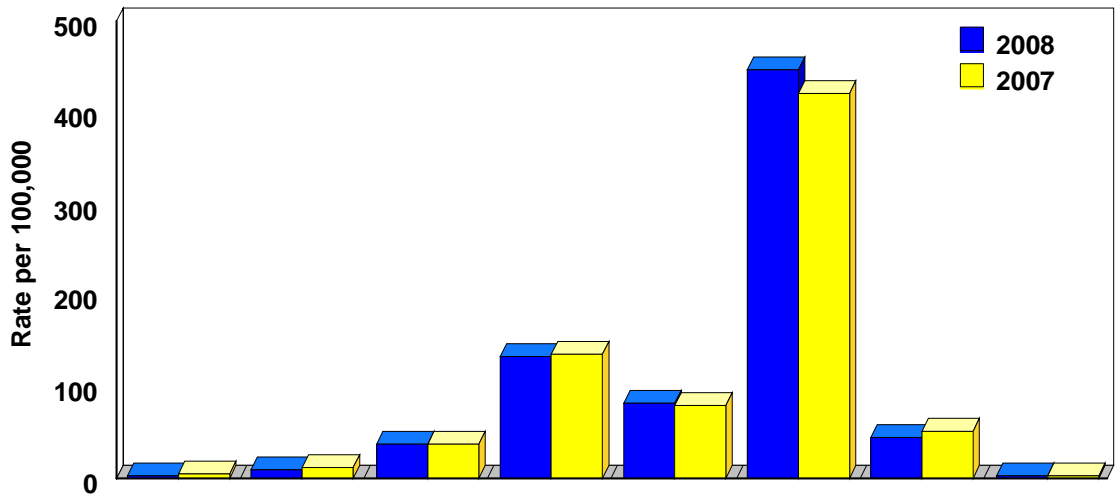

Jurisdiction	County	Population	Calculation	Total Crime Index
City	County 1	75,000	$.750 \times 2,500 =$	1,875
City	County 2	25,000	$.250 \times 2,500 =$	625
	Total	100,000	Total	2,500

SECTION III - CORE BASED STATISTICAL AREAS

Core Based Statistical Areas

The United States Office of Management and Budget developed new standards to define Core Based Statistical Areas (CBSAs) beginning in 2003. These new standards replace and supersede the 1990 standards for defining Metropolitan Statistical Areas.

CBSAs are defined as a statistical geographic entity consisting of the county or counties associated with at least one core (urbanized area or urban cluster) of at least 10,000 population, plus adjacent counties having a high degree of social and economic integration with the core as measured through commuting ties with the counties containing the core. The new standards designate and define two categories of CBSAs: Metropolitan Statistical Areas and Micropolitan Statistical Areas. These are the terms used for the basic set of county-based areas as defined under this classification.

Metropolitan Statistical Areas have at least one urbanized area of 50,000 or more population, plus adjacent territory that has a high degree of social and economic integration with the core as measured by commuting ties. Micropolitan Statistical Areas - a new set of statistical areas - have at least one urban cluster of 10,000 but less than 50,000 population, plus adjacent territory that has a high degree of social and economic integration with the core as measured by commuting ties. If the specified criteria are met, a Metropolitan Statistical Area containing a single core with a population of 2.5 million or more may be subdivided to form smaller groupings of counties referred to as Metropolitan Divisions. Counties that do not fall within CBSAs represent Outside Core Based Statistical Areas.

Six of Illinois' Metropolitan and Micropolitan Statistical Areas are part of areas in Indiana, Iowa, Kentucky, Missouri, and Wisconsin. Areas outside of Illinois are not represented in the statistics presented here. In some cases the percentages may not equal 100 due to rounding.

Metropolitan and Micropolitan Statistical Areas Summary

The Metropolitan and Micropolitan Statistical Areas summary includes county-based areas which meet the criteria for a Metropolitan or Micropolitan Statistical Area. The inhabitants of these areas account for 95.4 percent of the state population. The total crime index offenses of these areas account for 97.6 percent of the Illinois crime index offenses.

Metropolitan Statistical Areas Summary

The Metropolitan Statistical Areas comprise the central county or counties containing the core (urbanized area that has a population of at least 50,000), plus adjacent outlying counties having a high degree of social and economic integration with the central county as measured through commuting ties. There are 11 Metropolitan Statistical Areas that include 36 Illinois counties.

The inhabitants of the Metropolitan Statistical Areas represent 87.1 percent of the state's population. The Metropolitan Statistical Areas account for 91.1 percent of the Illinois crime index offenses.

Metropolitan Division Summary

A Metropolitan Division is a county or group of counties within a Metropolitan Statistical Area that contains a core with a population of at least 2.5 million. There are two Metropolitan Divisions that include counties in Illinois. The Chicago - Naperville - Joliet, IL - IN - WI Metropolitan Statistical Area is comprised of the Chicago - Naperville - Joliet, IL Metropolitan and the Lake County - Kenosha County, IL - WI Metropolitan Divisions.

The table below represents the population and crime index offenses for the counties (Cook, DeKalb, DuPage, Grundy, Kane, Kendall, McHenry, and Will) that are included in the Chicago - Naperville - Joliet, IL Metropolitan Division. The inhabitants of the Chicago - Naperville - Joliet, IL Metropolitan Division represent 59.5 percent of the state's population and account for 65.0 percent of the Illinois crime index offenses. The Lake County - Kenosha County, IL - WI Metropolitan Division is not included in this table since it includes areas in Wisconsin.

Micropolitan Statistical Areas Summary

The Micropolitan Statistical Areas comprise the central county or counties containing the core (urban cluster that has a population of at least 10,000, but less than 50,000), plus adjacent outlying counties having a high degree of social and economic integration with the central county as measured through commuting ties. There are 23 Micropolitan Statistical Areas that include 29 Illinois counties.

The inhabitants of the Micropolitan Statistical Areas represent 8.3 percent of the state's population. The Micropolitan Statistical Areas account for 6.5 percent of the Illinois crime index offenses.

Outside Core Based Statistical Areas Summary

Counties that do not qualify for inclusion in a Core Based Statistical Area are referred to as Outside Core Based Statistical Areas. There are 37 counties that are included in this category.

The inhabitants of Outside Core Based Statistical Areas represent 4.8 percent of the state's population. Outside Core Based Statistical Areas account for 2.4 percent of the Illinois crime index offenses.

SECTION IV - SUPPLEMENTAL DATA

DOMESTIC CRIMES, CRIMES AGAINST CHILDREN, CRIMES AGAINST SCHOOL PERSONNEL, HATE CRIMES DATA

In April 1996, the Illinois State Police began collecting additional crime information. This data includes statistics pertaining to offenses mandated by state and federal statutes and offenses concerning children. The data in this section reflects crimes occurring from January 1 through December 31, 2008. Due to limitations of agencies' reporting systems, all agencies are not included in the totals presented in the following tables. In some cases, the percentages may not sum to 100 due to rounding.

Domestic Crimes

This category reflects domestic-related crimes. Reporting domestic violence is mandated by Chapter 20 of the Illinois Compiled Statutes, 2630/5.1. Domestic-related crimes are defined as crimes committed by family or household members, including spouses, former spouses, parents, children, stepchildren and other persons related by blood or marriage, persons who share or formerly shared a common dwelling, and persons who have or allegedly have a child in common. In the case of a high-risk adult with disabilities, family or household member includes any person who has the responsibility for a high-risk adult as a result of a family relationship or who has assumed responsibility for all or a portion of the care of a high-risk adult with disabilities voluntarily, or by express or implied contract, or court order.

Crimes Against Children

Although reporting in this category is not mandated by state statutes, information is collected to research and evaluate the problems of offenses against children. Contributing agencies are not required to report this data to the I-UCR Program. All crimes reported to participating agencies that involve victims aged 16 years and younger are included in this category.

Crimes Against School Personnel

The reporting of attacks on school personnel is mandated by Chapter 105 of the Illinois Compiled Statutes, 5/10-21.7. The I-UCR Program collects information relating to all crimes committed against teachers, administrative personnel, or educational support personnel. This includes teacher's aides, bus drivers, or janitors, etc., who are employed by the school.

Hate Crime

The reporting of hate crime information is mandated by Chapter 20 of the Illinois Compiled Statutes, 2605-390(a) and the Federal Hate Crime Act. A hate crime is committed when, by reason of the actual or perceived race, color, creed, religion, ancestry, gender, sexual orientation, physical or mental disability, or national origin of another individual or group of individuals, a person commits homicide, criminal sexual assault, robbery, aggravated battery/assault, battery, assault, burglary, theft, motor vehicle theft, arson, criminal trespass, criminal damage to property, mob action, disorderly conduct, or harrassment. During 2008, 168 hate crime incidents were reported. Some incidents involved multiple offenses, accounting for a total of 180 offenses committed.

**SECTION V -
LAW ENFORCEMENT
EMPLOYMENT INFORMATION**

Law Enforcement Employment Information

The law enforcement employment information presented in this section is comprised of the number of part- and full-time sworn officers, full-time civilian employees, and auxiliary officers employed as of October 31, 2008. The part- and full-time sworn officer category includes the number of sworn personnel with full arrest powers (includes chiefs, sheriffs, commissioners, superintendents, etc.) who are paid by their agency or federal grant funds. The full-time civilian category includes civilian employees (includes clerks, stenographers, telecommunicators, mechanics, civilian jail personnel, etc.) who are paid by their agency or federal grant funds. The auxiliary officer category includes those officers, such as an auxiliary or reserve officer, who are subject to report in an emergency situation, and who are not paid by their agency or federal grant funds. Active auxiliary officers are accounted for under the part-time sworn officer category.

Sworn and civilian full-time law enforcement employees by agency type:

# of Sworn & Civilian Full-Time Employees	Police Departments	Sheriffs' Offices	Miscellaneous Agencies	Total	% of Total
0-10	470	10	40	520	50.2%
11-50	229	58	44	331	31.9%
51-200	111	24	11	146	14.1%
201+	26	10	3	39	3.8%
Total	836	102	98	1,036	100.0%

The employment rate for law enforcement personnel is calculated as follows:

$$\frac{\text{Number of Employees}}{\text{Jurisdictional Population}} \times 1,000 = \text{Employment Rate}$$

EXAMPLE:

A department with 60 employees and a population of 51,000 has an employment rate of 1.2 per 1,000 inhabitants:

$$\frac{60}{51,000} \times 1,000 = 1.2 \text{ Rate per 1,000 Inhabitants}$$

Law enforcement employment rates should not be directly compared to index crimes, non-index offenses, or the service-related activities performed by law enforcement officers. Service-related activities account for over 80 percent of the officers' workload, and usually remain unpublished. Each community should consider all the factors related to the causes of crime and determine the role of the law enforcement department relative to crime and to required services.

Law Enforcement Employment Information

Statewide

The statewide total number of law enforcement personnel in Illinois for 2008 is 59,834. The 42,272 part- and full-time sworn officers in 2008 account for 70.6 percent of the entire state of Illinois law enforcement community's work force. The 2008 employment rate for sworn employees of the entire state of Illinois law enforcement work force is 3.3 per 1,000 inhabitants. The 15,494 civilian employees comprise 25.9 percent of the entire state of Illinois law enforcement community's work force, with an employment rate of 1.2 per 1,000 inhabitants. The 2,068 auxiliary officers (officers not on active duty but subject to call in an emergency situation) in 2008 account for 3.5 percent of the entire state of Illinois law enforcement community's work force, with an employment rate of 0.2 per 1,000 inhabitants.

Police Departments

Police departments employed 37,732 law enforcement employees statewide in 2008 accounting for 63.1 percent of the state law enforcement employee total. The 31,429 part- and full-time sworn officers in 2008 account for 83.3 percent of the police department work force. The 2008 employment rate for sworn employees of police departments is 2.9 per 1,000 inhabitants. The 5,004 civilian employees comprise 13.3 percent of the police department work force, with an employment rate of 0.5 per 1,000 inhabitants. The 1,299 auxiliary officers in 2008 comprise 3.4 percent of the police department work force, with an employment rate of 0.1 per 1,000 inhabitants.

Sheriffs' Offices

Sheriffs' offices employed 15,238 law enforcement employees statewide in 2008 accounting for 25.5 percent of the state law enforcement employee total. The 6,040 part- and full-time sworn officers in 2008 account for 39.6 percent of the sheriffs' offices work force. The 2008 employment rate for sworn employees of sheriffs' offices is 3.0 per 1,000 inhabitants. The 8,473 civilian employees comprise 55.6 percent of the sheriffs' offices work force, with an employment rate of 4.1 per 1,000 inhabitants. The 725 auxiliary officers in 2008 comprise 4.8 percent of the sheriffs' offices work force, with an employment rate of 0.4 per 1,000 inhabitants.

Miscellaneous Agencies

Miscellaneous agencies employed 6,864 law enforcement employees statewide in 2008 accounting for 11.5 percent of the state law enforcement employee total. The 4,803 part- and full-time sworn officers in 2008 account for 70.0 percent of the miscellaneous agencies work force. These agencies include airports, colleges and universities, fire department/arson investigations, forest preserves, hospitals, other agencies, park districts, and railroads. Since miscellaneous agencies do not have a population, employment rates cannot be calculated. The 2,017 civilian employees comprise 29.4 percent of the miscellaneous agencies work force. The 44 auxiliary officers in 2008 comprise 0.6 percent of the miscellaneous agencies work force.
