# DEDICATION

This publication is dedicated to all law enforcement officers, and in particular, to those officers who lost their lives in the performance of duty while upholding the laws of the state of Illinois.

Trooper Kyle W. Deatherage

***“Courage knows no bounds greater than that,  
that a man or woman shall give his or her life in the  
service of his or her community.”***

***(Source Unknown)***

## **LAW ENFORCEMENT OFFICERS KILLED**

During 2012, one Illinois law enforcement officer lost his life in the performance of his duties while upholding the laws of the state of Illinois. A brief narrative of the circumstances surrounding this death is presented below.

### **November 26, 2012—ILLINOIS STATE POLICE**

Trooper Kyle W. Deatherage was struck and killed by a truck tractor semi trailer while conducting a traffic stop on the interstate. He had parked his motorcycle on the shoulder and was speaking with the driver of the vehicle when the collision occurred. Trooper Deatherage had served with the Illinois State Police for three years. He had five years of previous service as a deputy with the Madison County Sheriff's Department and service as an officer with the Staunton Police Department.

# INTRODUCTION

## The Illinois Uniform Crime Reporting Program

The Illinois Uniform Crime Reporting (I-UCR) Program was developed in 1971 and implemented on January 1, 1972. The Illinois State Police was given the responsibility to act as the central repository for crime statistics. Reporting crime statistics is mandated by Chapter 20 of the Illinois Compiled Statutes, 2630/8.

*2630/8. Crime Statistics.* The Department shall be a central repository and custodian of crime statistics for the State and it shall have all power incident thereto to carry out the purposes of this Act, including the power to demand and receive cooperation in the submission of crime statistics from all units of government.

Reporting agencies submit data on a monthly basis to the I-UCR Program. Participating jurisdictions include villages, municipalities, counties, colleges, universities, park districts, railroads, forest preserves, hospitals, and other miscellaneous agencies throughout Illinois.

Index Crime offenses, Index Crime arrests, and drug crime arrests are required to be reported by local law enforcement agencies. In April 1996, the Illinois State Police began the collection of additional crime statistics mandated by state and federal statutes. These include Domestic Related Offenses, Attacks Against School Personnel, and Hate Crimes. Crimes Against Children are also reported voluntarily to the I-UCR Program.

In 2010, the I-UCR Program transitioned to Index Crime reporting guidelines compliant with the Federal Uniform Crime Reporting Program. Not all previously participating reporting agencies have successfully transitioned to the revised reporting guidelines. Crime statistics submitted by agencies failing to adhere to the revised reporting guidelines were not accepted, and are not represented in this publication, impacting both county-wide and state-wide totals. Additional information regarding the revised reporting guidelines and subsequent Program impact is provided in detail on Page 6 through Page 8.

NOTE: The 2011 statistics represent data submitted as of February 23, 2012. The 2012 statistics represent data submitted as of November 18, 2013.

## Crime Statistics Interpretation Consideration

When comparing the crime statistics of one agency to those of another, many factors should be taken into consideration before drawing conclusions. Some conditions affecting the type and volume of crime are:

- Whether or not the reporting agency adhered to the revised offense definitions and applied revised scoring principles in the compilation of index crime statistics
- Population density and degree of urbanization
- Variations in composition of the population, particularly youth concentration
- Stability of population with respect to residents' mobility, commuting patterns, and transient factors
- Modes of transportation and highway system
- Economic conditions, including median income, poverty level, and job availability
- Cultural factors and educational, recreational, and religious characteristics
- Family conditions with respect to divorce and family cohesiveness
- Climate
- Effective strength of law enforcement agencies
- Administrative and investigative emphases of law enforcement
- Citizens' attitudes toward crime
- Crime reporting practices of citizens

Guard against direct agency-to-agency comparisons when analyzing I-UCR statistics. Such comparisons could be misleading unless demographic differences between jurisdictions are taken into account. Every community has unique social, ethnic, and economic factors which may affect its crime statistics. These dissimilarities may bias the results of any comparative analysis between agencies. The state of crime within a jurisdiction is complex and cannot always be defined based on statistics alone, as it might be when comparing one agency to another. The definition of jurisdiction itself may vary between agencies, as evidenced by railroad agencies and state agencies whose jurisdictions are comprised of non-geographical areas.

In addition, uniform crime reporting statistics reflect "offenses known to police." In other words, these crime counts and rates only reflect information on crimes reported to police, not necessarily all crimes that occurred. Propensity to report a crime varies by the type of crime and the individual characteristics of the victim. For more information, see the *National Crime Victimization Survey*, administered by the United States (U.S.) Department of Justice, Bureau of Justice Statistics.

In general, the decision to use any indicator for analysis purposes must be made with care. The statistical indicators presented within this publication have utility for law enforcement administrators; however, they must be used with caution. No single indicator is sufficient for thorough crime analysis. Instead, decisions law enforcement administrators are called upon to make require a multifaceted, analytical approach.

## I-UCR Reporting Agencies

Of the 1,000 plus law enforcement agencies in Illinois, 751 agencies reported 2012 statistics. The remaining agencies failed to report Index Crime statistics using submission protocol, submitted statistics non-compliant to reporting guidelines, or reported through an intermediary agency (sheriff's office, police department, etc.).

<b>Agency Type</b>	<b>2012</b>
Municipalities	582
Sheriffs' Offices	96
Colleges & Universities	39
State Agencies	5
Railroads	9
Park Districts	10
Forest Preserves	4
Other Agencies	6
<b>TOTAL</b>	<b>751</b>

## The Crime Index/Crime Rate

A majority of the offense and arrest statistics in this publication focus primarily on what are known as Index Crimes. The eight crime categories that make up this index provide an indication of the extent serious crime occurs in the jurisdiction, region, or state. Three of the eight Index Crime categories collected are crimes against persons including criminal homicide, forcible rape, and aggravated battery/aggravated assault. The five remaining categories are crimes against property including robbery, burglary, theft, motor vehicle theft, and arson.

The Illinois Uniform Crime Reporting (I-UCR) Program's **crime index** translates into the number of offenses reported within the eight Index Crime categories as defined by the Federal UCR Program.

**Criminal Homicide** - The willful (non-negligent) killing of one human being by another.

**Forcible Rape** - The carnal knowledge of a female, forcibly and against her will; attempts are included.

**Robbery** - The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or putting the victim in fear; attempts are included.

**Aggravated Battery/Aggravated Assault** - An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault is usually accompanied by the use of a weapon or by means likely to produce death or great bodily harm. It is not necessary that an injury results from the attack when a weapon is used that could cause great personal injury; attempts and attempted criminal homicide are included.

**Burglary** - The unlawful entry of a structure to commit a felony or a theft; attempts are included.

**Theft** - The unlawful taking, carrying, leading, or riding away of property from the possession of another; attempts are included.

**Motor Vehicle Theft** - The theft or attempted theft of a motor vehicle.

**Arson** - Any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, or personal property of another; attempts are included.

The **crime rate** indicates the prevalence of crime occurring across a given population. It is generally defined as the total number of Index Crimes per 100,000 inhabitants and is calculated as follows:

$$\frac{\text{Index Crime Count} \times 100,000}{\text{Jurisdictional Population}} = \text{Crime Rate}$$

The jurisdictional population can be that of a city, town, village, county, or state.

The **percent change** indicates the increase or decrease of the volume of statistics reported

$$\frac{\text{Current Total} - \text{Previous Total}}{\text{Previous Total}} \times 100 = \text{Percent Change}$$

## Index Crime Offense Classification

In 2010, the I-UCR Program transitioned and became compliant with the Federal UCR Program's reporting guidelines. This transition significantly impacted the classification and scoring procedures agencies use in compiling Index Crime statistics.

Offenses occurring within a crime incident must first be classified into the appropriate category as defined by the Federal UCR Program. The definitions for the eight Index Crime categories can be found on Page 6. The definitions do not, in all cases, mirror Illinois Compiled Statutes (ILCS) offense definitions. It is critical for an agency to review the definitions prior to submitting statistics to ensure only offenses meeting the definition are reported. This will avoid the potential to both over and under report offenses. The text below highlights the definition changes in three of the eight Index Crime categories and how these changes are expected to impact 2010 and subsequent years' statistics. There was no change to the definitions of Criminal Homicide, Robbery, Burglary, Theft, and Motor Vehicle Theft.

**Forcible Rape** (Previously Criminal Sexual Assault) - Carnal knowledge is defined as "the act of a man having sexual bodily connections with a woman; sexual intercourse." The previously collected offenses of sodomy, criminal sexual assault with an object, statutory rape, sexual relations within families, indecent solicitation of a child or adult, and sexual exploitation of a child are no longer reported. **Impact:** Statistics have the potential to decrease as compared to the 2009 and previous reporting years based on the revised definition.

**Aggravated Battery/Aggravated Assault** - The ILCS allows battery and assault offenses to be elevated to aggravated based on who the victim was (police officer, correctional officer, fireman, private security officer, teachers, emergency medical technicians, disabled persons, persons age 60 years or older, and pregnant victims); where the incident took place (public way, public property, or sports or entertainment arenas when events are scheduled); or if the assailant conceals his identity (hooded, robed, or masked). If the battery or assault offense is elevated to aggravated based ONLY on one of the criteria above, the offense is not classified as aggravated and should not be reported. **Impact:** Statistics have the potential to decrease as compared to the 2009 and previous reporting years based on the revised definition.

**Arson** - The ILCS stipulates that the value of damaged property must be \$150.00 or more for an offense to be classified as an arson. The revised definition requires the reporting of any willful malicious burning or attempt to burn property as an arson without regard to the value of the property. **Impact:** Statistics have the potential to increase as compared to the 2009 and previous reporting years based on the revised definition.

**Burglary and Theft** - There were no changes to the definition for either offense category. Historically, vehicle burglaries have been classified and reported as thefts. Many agencies were incorrectly classifying and reporting vehicle burglaries in the burglary category. The development of more detailed reporting guidelines coupled with a statewide training initiative resulted in a better understanding of the definition of burglary. **Impact:** Burglary statistics have the potential to decrease as compared to the 2009 and previous years reporting year. Theft statistics have the potential to increase as compared to the 2009 and previous reporting years.

## **Index Crime Offense Classifications**

Once offenses in a crime incident have been classified, agencies are tasked with scoring or counting the number of offenses having occurred. The correct method of scoring offenses incorporates the application of the Hierarchy Rule, Crimes Against Persons versus Crimes Against Property scoring rules, the Hotel Rule, and Separation of Time and Place Rule. Each of these scoring rules will have an impact by decreasing the number of offenses reported.

### **Hierarchy Rule**

The order in which the Index Crime categories are listed on Page 6 is significant, establishing the hierarchy order. Criminal homicide is ranked as the highest offense in the hierarchy order and arson is ranked the as the lowest offense. If several offenses are committed within one incident, it is referred to as a multi-offense incident. The Hierarchy Rule requires that when a multi-offense incident has occurred, the agency must identify which of the offenses is the highest in the hierarchy order and report only that offense. The other offenses in the multi-offense incident are not reported. Motor vehicle theft and arson are exceptions to the Hierarchy Rule.

In instances where a motor vehicle theft is reported along with an additional theft in a multi-offense incident, the motor vehicle theft is the only offense reported with no regard for the Hierarchy Rule. This exception only applies when motor vehicle theft and theft alone are the only offenses reported in a multi-offense incident.

If the offense of arson occurs in a multi-offense incident, the reporting agency must report the arson and then apply the Hierarchy Rule to the remaining offenses to determine which offense is the highest in the hierarchy order. Both the arson and the highest-ranking offense must be reported.

### **Crimes Against Persons - Crimes Against Property**

Categorizing an offense as a crime committed against a person or committed against property is the next step in scoring offenses. Criminal homicide, forcible rape, and aggravated battery/aggravated assault are crimes against persons. For these categories, one offense is scored for each victim. The number of offenders involved in the incident is irrelevant. Robbery, burglary, theft, motor vehicle theft, and arson are crimes against property. For robbery and theft, one offense is scored for each distinct operation or attempt, regardless of the number of victims or offenders. For burglary, motor vehicle theft, and arson, each offense is scored independently.

### **Hotel Rule**

Burglaries of hotel or motel rooms, lodging houses, spas, resorts, or other places where lodging is the main purpose are scored differently than other burglaries. If a number of rooms are burglarized over the same time frame, the burglaries are scored as one offense.

### **Separation of Time and Place**

Separation of time and place means that the time interval between same offenses and the distances between locations where they have occurred are insignificant. Offenses must have occurred during an unbroken time frame and at the same or adjoining locations. In these cases the offenses are reported as a single offense. This rule is applied to the property crimes of theft and robbery only. It is not applied to crimes against persons, or the remaining crimes against property of burglary, motor vehicle theft, or arson.

## Index Crime and Drug Offense Arrest Data

Historically, arrest data has not represented a 'clearance rate' for a specific law enforcement agency, a county, or for the state of Illinois as compared to the number of Index Crime offenses reported. Due to a variety of circumstances, an offense may be administratively or exceptionally cleared with no arrest. An example is an incident where a suspect commits a homicide and then commits suicide. An arrest cannot be made; however, the incident is noted as cleared by one of the two aforementioned means.

Additionally, there are numerous guidelines that must be adhered to when reporting Index Crime arrests. The following guidelines, though not inclusive, represent a majority of the critical arrest reporting guidelines.

- Agencies report one arrest for each individual suspect arrested for a specific Index Crime offense, regardless of how many cases of the same offense may be cleared. Example: A suspect is arrested for six residential burglaries occurring over a four month period. Only one arrest for burglary is submitted.
- The Hierarchy Rule must be applied. If a suspect is arrested for multiple Index Crime offenses having occurred within a single incident, an arrest is submitted only for the most serious offense. Example: A suspect is arrested for home invasion and second degree murder. The only arrest submitted is the arrest for second degree murder.
- Arrest data is submitted for the month in which the arrest occurred, not for the month in which the offense occurred and was subsequently reported. An offense may have occurred in November 2011, and an arrest not made until May of the following year. The Index Crime offense is submitted and reflected in the 2011 report, and the associated arrest is submitted and reflected in the 2012 report.
- The guidelines governing the submission of Drug Offense arrests differ from Index Crime arrest reporting guidelines. Agencies submit the number of offenses in each drug category where an arrest has been made. One suspect may be arrested for possession of cannabis, possession of a controlled substance, and possession of drug paraphernalia. An arrest in each of the three categories is submitted.

Due to the complexity of Index Crime arrest reporting guidelines, individual agency arrest statistics are not provided to prevent use of the data in an attempt to arrive at a clearance rate. Index Crime arrest data is, however, compiled for each county, and the state of Illinois. Drug Offense arrest statistics are similarly compiled.

# **INDEX CRIME OFFENSE & CRIME RATE DATA**

## Index Crime Offense & Crime Rate Data

This section primarily focuses on Index Crime offenses reported to police. The Illinois Uniform Crime Reporting Program Index Crime offenses include the categories of criminal homicide, forcible rape, robbery, aggravated battery/aggravated assault, burglary, theft, motor vehicle theft, and arson. The state of Illinois Index Crime offense and arrest rate comparison for 2013 and 2012 are presented on Page 15, followed on Page 16 by the state of Illinois primary page.

The state of Illinois primary page provides a compilation of statistics reported by participating police departments, sheriff's offices, and statewide law enforcement agencies. Statistics include Index Crime offenses, arrests, and associated crime rates per 100,000 inhabitants; Drug offense arrests; Supplemental Data comprised of attacks against school personnel, crimes against children, and domestic related offenses; and Hate Crimes.

Following the state of Illinois primary page is an alphabetical listing of primary pages for Illinois counties. County totals reflect crime data reported by police departments and the sheriffs' office located within the county; however, data reported from state agencies is excluded. Below each county primary page is a listing of agencies within the county that submitted data for the 2013 and/or 2012 reporting years. The Sheriff's Department is listed first, followed by an alphabetical listing of the remaining agencies. The Index Crime rate, as well as Index Crime offense category totals are provided for each agency.

Caution should be exercised when reviewing and using this information. Many social factors related to crime and a community's population must be considered when making statistical comparisons. A community may have a small residential population but a large transient population due to a substantial number of employers, motels, entertainment attractions, etc., within its jurisdiction. A large transient population is also prevalent in small communities located in metropolitan areas adjacent to Chicago and Saint Louis. A large transient population increases the potential for criminal behavior within a small jurisdiction. The resulting higher population-based crime rate does not compensate for a transient population. The final statistics can lend to the impression that crime is more prevalent due to the exclusion of the transient population in calculation processes.

The footnote and acronyms in the county primary pages are defined as follows:

- **1** - "**Incomplete data**" indicates an agency did not participate in the I-UCR Program for one or more months (due to the agency being disbanded or created during the reporting year) or one or more monthly index reports were delinquent.
- **MCA** - indicates an agency whose jurisdiction involves more than one county. Offenses are sorted and reported by county of occurrence. Only offenses having occurred in the related county primary page are provided. Complete reports for an MCA agency can be found in Section V - Appendix.
- **V\*** - indicates whether or not (Y or N) an agency verified 2013 statistics during the annual verification process.
- **N/C** - indicates the percentage change could not be calculated.
- Chicago PD has been unable to develop a technical solution to address certain definition and scoring changes. Forcible Rape is over-reported (reported non-qualifying Criminal Sexual Assault offenses) and Aggravated Battery/Aggravated Assault is under-reported (one offense per incident is reported instead of reporting the number of victims).

## Index Crime Offense/Crime Rate Data

This section used the most recent complete census population statistics available from the U.S. Bureau of the Census. The Federal Bureau of Investigation, which is the administrator of the Federal UCR Program, provided population statistics derived from U.S. Bureau of the Census resources for sheriff's offices, municipalities, county, and statewide populations.

Multi-county agencies are encouraged to report crime independently for each county; however, some continue to report total crime incident totals with no regard to county of occurrence. In these cases, the I-UCR Program has proportioned each of the multi-county agencies' crime rate, crime index total, and each of the eight Index Crime offenses based on the percentage of the population residing in each county. In some cases, the percentages may not sum to 100 due to rounding. Of the reporting agencies, there were 81 cities with I-UCR reporting jurisdictions located in more than one county (see pages 223-240 for a list of multi-county agencies).

Example:

A city with a population of 100,000 has 75,000 or 75.0 percent of its population in County 1 and 25,000 or 25.0 percent of its population in County 2. The total crime index offenses reported by the agency in 2012 is 2,500.

The crime index has been computed as follows for County 1 and County 2:

Jurisdiction	County	Population	Calculation	Total Crime Index
City	County 1	75,000	0.750 X 2,500 =	1,875
City	County 2	25,000	0.250 X 2,500 =	625
	Total	100,00	Total	2,500

## **State Agencies**

The table on the following page includes Index Crime offense data reported by state of Illinois law enforcement agencies. Due to the volume of data state agencies submit encompassing the entire state jurisdictionally, offenses are not reported by location of occurrence. Data submitted by these agencies is excluded from county totals; however, the data is included in the statewide totals.

# SUPPLEMENTAL DATA

## **Domestic Related Offenses, Crimes Against Children, Attacks Against School Personnel**

In 1996, the Illinois State Police began collecting Supplemental Data statistics as mandated by state statutes. Supplemental Data encompasses domestic related offenses, crimes against children, and attacks against school personnel. Continued training efforts increased agency participation and may have contributed to increases in the number and types of offenses reported in 2011. Despite increased participation achieved in 2011, many agencies in 2012 failed to transition to the on-line reporting system method of submitting Supplemental Data. As a result, almost one hundred fewer agencies submitted data and the number and types of offenses reported in 2012 decreased.

### **Domestic Related Offenses**

The reporting of domestic related offenses is mandated by Chapter 20 of the Illinois Compiled Statutes, 2630/5.1. Domestic related offenses is defined as any offense attempted or committed where a domestic relationship exists between the victim and offender. Reporting is not limited to the offenses of domestic battery, violation of order of protection, criminal sexual assault, and other offenses generally associated with domestic violence. Domestic relationship is defined as family or household members, including spouses, former spouses, parents, children, stepchildren and other persons related by blood or by present or previous marriage, persons who share or formerly share a common dwelling, persons who have or allegedly have a child in common, persons who have or have had a dating or engagement relationship, and persons with disabilities and their personal care assistants or care givers outside the context of an employee of a public or private care facility. Agencies voluntarily submit domestic disputes where no offense has occurred.

### **Crimes Against Children**

Although reporting in this category is not mandated by state statute, information is voluntarily submitted by agencies. This information provides statistics used to research the type and frequency of offenses committed against victims aged 16 years and younger.

### **Attacks Against School Personnel**

The reporting of attacks against elementary and secondary school personnel is mandated by Chapter 105 of the Illinois Compiled Statutes, 5/10-21.7. Select offenses committed against teachers, administrative personnel, and other school personnel by students are reported. Other school personnel includes teacher's aides, bus drivers, hall monitors, custodians, cafeteria workers, etc., who are employed by the school. An attack is defined as the offenses of criminal homicide, aggravated battery, aggravated assault, criminal sexual assault, battery, and assault. The offense need not have occurred on school grounds or during scheduled school day hours, as long as the victim was performing duties associated with their position when the attack occurred. The exception to this rule is when an attack occurs when the victim is not acting in an official capacity; however, the attack is motivated by actions the school personnel took against the student while acting in an official capacity.

# HATE CRIME

## Hate Crime Data

The reporting of select hate crime offenses is mandated by Chapter 20 of the Illinois Compiled Statutes, 2605-390(a). A hate crime is committed when, by reason of the actual or perceived race, color, creed, religion, ancestry, gender, sexual orientation, physical or mental disability, or national origin of another individual or group of individuals, a person commits an offense against the individual or group of individuals. Additionally, the Hate Crime Statistics Act of 1990 mandates the reporting of hate crime offenses to the Federal Uniform Crime Reporting (UCR) Program, administered by the Federal Bureau of Investigation (FBI).

An important qualifier must be present when reporting a hate crime. The fact that the offender is biased against the victim’s race, religion, disability, sexual orientation, or ethnicity/national origin does not mean that a hate crime occurred. The offender’s criminal act must have been motivated by his bias. Before an offense can be reported as a hate crime, sufficient facts must be present to lead a reasonable person to conclude that the offender’s actions were motivated by his bias. Random acts of vandalism (graffiti being the most common) with no specific victim or intended target, are not reported.

There are differences in the offenses that must be reported as mandated by the Illinois Compiled Statutes (ILCS) when compared to the Hate Crime Statistics Act of 1990 mandate. Certain offenses required by the ILCS do not qualify for reporting to the Federal UCR Program and are not forwarded to the FBI. Offense definitions differ as well, and definitions used by the Federal UCR Program do not always align with ILCS offense definitions. Example: The ILCS offense of battery equates to the Federal UCR Program offense of assault. This creates the potential for discrepancies between hate crime statistics published in the annual Crime in Illinois versus Crime in the United States publications.

# **LAW ENFORCEMENT EMPLOYEES**

# **IV**

### Law Enforcement Employment Information

The law enforcement employment information presented in this section is comprised of the number of part- and full-time sworn officers, full-time civilian employees, and auxiliary officers employed as of October 31, 2012. The part- and full-time sworn officer category includes the number of sworn personnel with full arrest powers (includes chiefs, sheriffs, commissioners, superintendents, etc.) who are paid by their agency or federal grant funds. The full-time civilian category includes civilian employees (clerks, stenographers, telecommunicators, mechanics, civilian jail personnel, etc.) who are paid by their agency or federal grant funds. The auxiliary officer category includes those officers, such as an auxiliary or reserve officer, who are subject to report in an emergency situation, and who are not paid by their agency or federal grant funds. Auxiliary officers paid by their agency or federal grant funds are accounted for under the part-time sworn officer category.

The employment rate for law enforcement personnel is calculated as follows:

$$\frac{\text{Number of Employees}}{\text{Jurisdictional Population}} \times 1,000 = \text{Employment Rate}$$

**EXAMPLE:**

A department with 60 employees and a population of 51,000 has an employment rate of 1.2 per 1,000 inhabitants:

$$\frac{60}{51,000} \times 1,000 = 1.2 \text{ Rate per 1,000 Inhabitants}$$

Law enforcement employment rates should not be directly compared to index crimes, non-index offenses, or the service-related activities performed by law enforcement officers. Service-related activities account for over 80 percent of the officers' workload, and usually remain unpublished. Each community should consider all the factors related to the causes of crime and determine the role of the law enforcement department relative to crime and to required services.

## 2012 Law Enforcement Employment Information

### Statewide

The statewide total number of law enforcement personnel in Illinois for 2012 is 49,932. The 35,001 part- and full-time sworn officers in 2012 account for 70.1 percent of the entire state of Illinois law enforcement community's work force. The 2012 employment rate for sworn employees of the entire state of Illinois law enforcement work force is 3.0 per 1,000 inhabitants. The 13,733 civilian employees comprise 27.5 percent of the entire state of Illinois law enforcement community's work force, with an employment rate of 1.2 per 1,000 inhabitants. The 1,198 auxiliary officers (officers not on active duty but subject to call in an emergency situation) in 2012 account for 2.4 percent of the entire state of Illinois law enforcement community's work force, with an employment rate of 0.1 per 1,000 inhabitants.

### Police Departments

Police departments employed 30,983 law enforcement employees statewide in 2012 accounting for 62.1 percent of the state law enforcement employee total. The 26,386 part- and full-time sworn officers in 2012 account for 85.2 percent of the police department work force. The 2012 employment rate for sworn employees of police departments is 2.7 per 1,000 inhabitants. The 3,901 civilian employees comprise 12.6 percent of the police department work force, with an employment rate of 0.4 per 1,000 inhabitants. The 696 auxiliary officers in 2012 comprise 2.2 percent of the police department work force, with an employment rate of 0.1 per 1,000 inhabitants.

### Sheriffs' Offices

Sheriffs' offices employed 13,768 law enforcement employees statewide in 2012 accounting for 27.5 percent of the state law enforcement employee total. The 5,120 part- and full-time sworn officers in 2012 account for 37.2 percent of the sheriffs' offices work force. The 2012 employment rate for sworn employees of sheriffs' offices is 2.8 per 1,000 inhabitants. The 8,154 civilian employees comprise 59.2 percent of the sheriffs' offices work force, with an employment rate of 4.5 per 1,000 inhabitants. The 494 auxiliary officers in 2012 comprise 3.6 percent of the sheriffs' offices work force, with an employment rate of 0.3 per 1,000 inhabitants.

### Miscellaneous Agencies

Miscellaneous agencies employed 5,181 law enforcement employees statewide in 2012 accounting for 10.4 percent of the state law enforcement employee total. The 3,493 part- and full-time sworn officers in 2012 account for 67.4 percent of the miscellaneous agencies work force. These agencies include airports, colleges and universities, fire department/arson investigations, forest preserves, hospitals, other agencies, park districts, and railroads. Since miscellaneous agencies do not have a population, employment rates cannot be calculated. The 1,678 civilian employees comprise 32.4 percent of the miscellaneous agencies work force. The 8 auxiliary officers in 2012 comprise 0.2 percent of the miscellaneous agencies work force.
